# ARTHREX ASIA PACIFICS LEARNING INITIATIVES

With over 25 years experience in the orthopaedic industry, Arthrex represents a dedicated commitment to provide simple, safe and reproducible surgical solutions in minimally invasive orthopaedic surgery. Our mission is to combine the finest quality engineered products with a comprehensive program of educational and support services to meet the needs of the orthopaedist and patient.

*Presentation at the Chulalongkorn University*

Now Arthrex's commitment has extended to Asia Pacific, with a fully equipped educational facility located in Bangkok, Thailand. Arthrex welcomes surgeons to participate in a unique, intimate and practical lab experience instructed by leading orthopaedic surgeons. The programs held at the Bangkok facility focus on minimally invasive knee and shoulder surgery, with both basic and advanced courses offered.

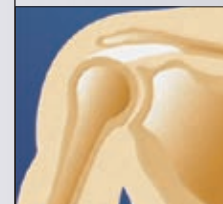

## PROGRAM

State-of-the-art concepts are taught by leading orthopaedic surgeons and personal attention is guaranteed with a limited number of participants for each course. One (fresh) cadaveric specimen is provided for a maximum of two orthopaedic surgeons per station. Arthrex international management and attending lab staff complement the instruction by providing the necessary support.

*Wet Lab Workstations at the Chulalongkorn University*

## Shoulder Surgery

- Arthroscopic Repair of Shoulder Instability & SLAP
- Capsular Shift for Multidirectional Instability
- AC Resection / ASD Arthroscopic Rotator Cuff Repair Bio-Tenodesis Reconstruction

## Knee Surgery

- ACL Reconstruction
