HELPING SURGEONS TREAT THEIR PATIENTS BETTER

ArthroLab Faculty

At Arthrex, ongoing education is a key element of our corporate philosophy. This is why we have invested in our own hands on surgical skills training centers, all over the world.

ARTHROLAB

At the Isar Medical Centre in Munich, Arthrex operates the most modern training laboratory of its kind, the ArthroLab.

Whether in groups or one-to-one training, surgical technique training is facilitated by twelve fully equipped arthroscopy stations including x-ray capability, with a full time medically trained support staff. A training room, surgeon's lounge and a comprehensive didactic presentation auditorium completes the facility.

The Isar Medical Centre is located in the heart of Munich, nestled between shopping streets and hotels. The main train station is just a five minute walk away.

Our training courses include:

- Individual surgical skills training
- Repair and reconstruction procedures of the knee, shoulder, hip and small joints
- Cadaveric hands-on surgical experience
- Wet and dry lab options
- Live transmission of surgical procedures to lecture hall
- Scheduling of surgeon observation sessions
- Presentations of papers and case studies
- Training courses for all skill levels
- Dedicated and trained medical staff
- Close contact with specialists in the field
- Information material and related science on all surgical techniques and instruments

Furthermore, at the European Training Center in Cologne, surgeons and assistant staff have the opportunity to participate in a coordinated surgeon observation program in close cooperation with the MediaPark Klinik, Cologne. State of the art surgeries can be observed live with a special focus on orthobiologic treatment.
