

Dear Valued Customer,

As part of our ongoing commitment to provide surgeons and health care facilities with the most advanced and reliable technology, Arthrex is discontinuing the sale of the DrillSaw 400 and 600 power systems in the United States effective July 1, 2022. End-of-service support for these systems will conclude on June 30, 2026.

To support your clinical and operational needs moving forward, we are pleased to offer the Synergy Power™ system, a powerful, versatile, and reliable battery-powered platform designed to deliver consistent performance across a wide range of orthopedic procedures, including sports, arthroplasty, trauma, and distal extremity applications. With its dual trigger rotary drill and dedicated sagittal saw, the Synergy Power system provides the precision, versatility, and efficiency required in today's demanding surgical environments.

We appreciate your partnership and look forward to supporting your continued success with our latest innovations. For additional information, please contact your local Arthrex representative.

Best regards,

The Arthrex Imaging & Resection Product Management Team
