

Eclipse™ Total Shoulder System

The Cage-Screw Difference

- 13+ years of long-term survivorship data¹
- Anatomic restoration of center of rotation²
- Proprietary cage-screw fixation provides dynamic compression at the bone–prosthesis interface and reduces medial calcar osteolysis³
- Single instrument tray allows streamlined 3-step implantation
- Reproducible SpeedScap™ subscapularis repair system
- Titanium options for nickel-sensitive patients
- Revision-friendly design
