

Shoulder and Elbow

Next Generation in Repair and Reconstruction

Arthrex® 

Helping Surgeons Treat Their Patients Better[®]

Since its inception, Arthrex has been committed to one mission: Helping Surgeons Treat Their Patients Better. We are strategically focused on constant product innovation through scientific research, surgeon collaboration, and medical education to make less invasive surgical procedures simple, safer, and more reproducible. Each year, we develop more than 1,000 new innovative products and procedures to advance minimally invasive orthopedics worldwide.

Arthrex has always remained a privately held company, which allows for the rapid evaluation of new technologies and ideas and the freedom to develop products and techniques that truly make a difference. Our experienced team of dedicated professionals represents a shared passion and commitment to delivering uncompromising quality to the health care providers who use our products and the millions of patients whose lives we impact.

The medical significance of our contributions serves as our primary benchmark of success and will continue into the future as the legacy of Arthrex.

SwiveLock® C Suture Anchor

This closed-eyelet, twist-in knotless anchor can be used as the lateral row of the SutureBridge™ repair. Additionally, it can be combined with FiberTape® suture for SpeedFix™ and SpeedBridge™ repairs. Knotless versions incorporate a knotless tensionable mechanism in the eyelet.

SwiveLock® SP Suture Anchor

Eliminate the need for prepunching a bone socket with the SwiveLock SP (self-punching) anchor. These anchors have a variety of options, including PEEK or titanium tip with a biocomposite, PEEK, or titanium anchor body. The self-punching design can help save valuable OR time, while increasing the precision of the final construct. Combine the SwiveLock SP anchor with the 2.6 FiberTak® RC for a fully self-punching FiberTak SpeedBridge™ knotless rotator cuff repair.

2.6 FiberTak® Soft Anchors

2.6 FiberTak RC soft anchors are specifically designed for surgeons who prefer an all-suture anchor for the medial row of a double-row, bridging rotator cuff repair. They are combined with knotless SwiveLock® C anchors for the lateral row. The unique 2.6 FiberTak RC anchor has a 1.7 FiberTape® suture fixed to the sheath so that it cannot slide, making it easy to tension the lateral row for a totally knotless construct. The 2.6 FiberTak RC anchor is available with a tensionable knotless mechanism or a sliding 1.3 mm SutureTape that can be incorporated into the repair, or discarded, for ultimate flexibility.

Knotless 2.6 FiberTak soft anchors—which offer versatility for rotator cuff repairs—can be used in multiple configurations (simple stitches, mattress stitches, or interconnected). These anchors are ideal for repairs such as upper border subscapularis, PASTA, or remplissage. Double- and triple-loaded 2.6 FiberTak options feature the latest SutureTape technology for knotted repairs for single- or double-row repairs.

The self-punching inserter for select FiberTak anchors allows for direct insertion into bone without creating a prepunched or predrilled socket for anchor insertion. The self-punching FiberTak inserter may be used with a guide and can be placed directly into bone or used with a transtendon insertion technique.

2.6 FiberTak RC Soft Anchor

Product Description	Item Number
With 1.7 mm TigerTape™ Loop (white/black) and 1.3 mm SutureTape (white/blue), self-punching, qty 5 (a)	AR-3652SP

CuffMend™ Rotator Cuff Augmentation System

The CuffMend™ system provides an efficient, simplified approach for augmentation of partial- and full-thickness rotator cuff tears. The system employs the benefits of an ArthroFLEX® dermal allograft, which provides mechanical strength and supports healing.^{1,2} The graft is introduced using the graft spreader and attached medially with the FiberStitch™ RC implants for soft-tissue fixation to the rotator cuff tendon. This allows the augmentation to span the complete tendon length. PushLock® anchors are used, spanning the graft over the tuberosity footprint, for lateral bony fixation. Scientific literature supports the use of acellular dermal grafts as a safe and effective solution for rotator cuff augmentation.³

Implants

Product Description	Item Number
CuffMend Rotator Cuff Augmentation Implant System	AR-19041S
Includes: two FiberStitch curved RC Implants, two 3.5 mm BC PushLock w/ SP PEEK eyelet, three #0 FiberWire sutures w/needles, one each FiberLink and TigerLink 0.9 mm SutureTape, an HD Scorpion needle w/ MegaLoader, graft spreader, and knot pusher/ suture cutter w/portal skid

PushLock® Suture Anchor

The unique knotless design allows tension to be adjusted intraoperatively while helping to ensure precise tissue reduction and fixation.

The self-punching anchor was developed to help speed completion of a SutureBridge™ repair. The titanium and PEEK tips minimize the need to prepare a bone socket for the lateral row, where soft tissue can sometimes obscure the view.

Superior Capsular Reconstruction for Massive Irreparable Rotator Cuff Tears Surgical Technique	LT1-00020-EN

Biologic TuberoPlasty Technique

Biologic tuberoPlasty harnesses the power of ArthroFlex HDA to provide a biologic cushion between acromion and tuberosity, preventing bone on bone contact in an irreparable rotator cuff tear. Self punching tensionable knotless technology allows the ArthroFlex graft to be placed in a quick, effective, and reproducible technique preventing shoulder impingement syndrome, often associated with shoulder pain.

PASTA Bridge\Remplissage

Use this technique for transtendon repair of partial, articular-sided supraspinatus tendon avulsions, providing a secure bridging repair intended to enhance footprint compression and maximize contact between tendon and bone.

Product Description	Item Number
PASTA Bridge Repair Implant System	AR-1934PRK
Two 2.4 BioComposite SutureTak® anchors 4.75 mm BioComposite SwiveLock® anchor Disposable spear Disposable punch 17-ga spinal needle 1.1 mm nitinol guidewire Dilator	

Knotless Corkscrew® Suture Anchor

The partially threaded Knotless Corkscrew anchor provides knotless soft-tissue fixation and has a tensionable suture-locking mechanism. Suture is passed and shuttled into the locking mechanism, allowing users to control the tension of knotless repairs. These anchors can be used for PASTA, remplissage, upper subscapularis, and SCR repairs.

Corkscrew® FT Suture Anchors

A fully threaded (FT) design over the entire length of the suture anchor provides cortical fixation. When inserting into hard bone, the internal drive mechanism substantially increases resistance to stripping. The recessed FiberWire® suture eyelet is self-aligning and minimizes suture abrasion during knot tying. The Corkscrew FT suture anchors are available in biocomposite (β -TCP and PLLA), PEEK, titanium, and bio materials.

FiberTak® Anchor Glenoid Labrum Repair Surgical Technique	LT1-00021-EN

PushLock® Suture Anchor

PushLock suture anchors are designed for simple and secure arthroscopic glenohumeral joint instability repair. This knotless technique saves valuable time and eliminates the possibility of knot impingement. The “suture-first” technique allows suture to be passed independently through a desired amount of tissue prior to anchor implantation. Multiple suture configurations, including simple, cinch, and mattress stitches, can be accomplished with FiberWire®, FiberLink™, FiberStick™, and LabralTape™ sutures using the Labral Scorpion™ or QuickPass™ SutureLasso™ suture retriever. Tissue tension can be visualized and adjusted, if necessary, prior to final anchor implantation.

Labral SwiveLock® Suture Anchor

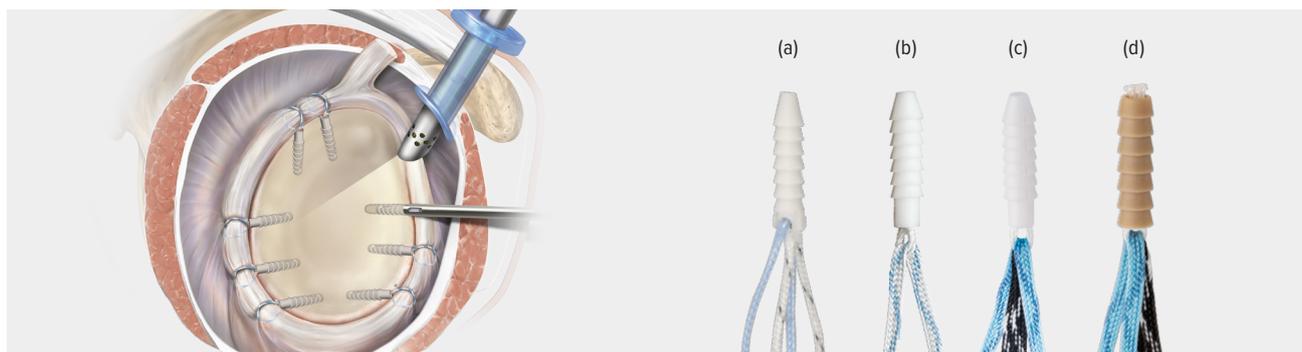

Screw-in, knotless SwiveLock anchors have been miniaturized to treat shoulder instability. Used like a labral PushLock anchor, this anchor offers all of the same knotless advantages (low-profile, quick, "suture-first" technique with multiple stitch configuration options) for surgeons who prefer a threaded anchor.

SutureTak® Suture Anchor

SutureTak anchors are available in a variety of sizes, materials, and suture options. Biocomposite anchor options contain a molded-in suture to reinforce the strength of the anchor and suture eyelet. The nonabsorbable PEEK SutureTak anchor has a material eyelet that provides superior abrasion resistance due to PEEK's low coefficient of friction. Anchor insertion and delivery are made simple by drilling through a spear and inserting the anchor through the same spear into the drilled hole.

Short Spade-Tip Drill	AR-1256

3 mm Knotless SutureTak Suture Anchor

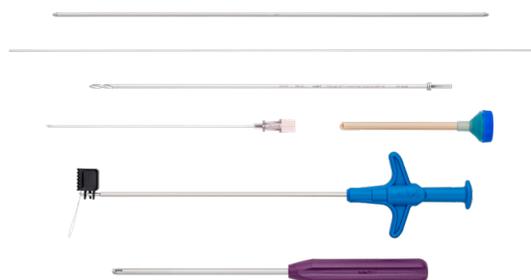

The knotless SutureTak anchor locking mechanism uses a simple and reproducible technique, allowing controlled tensioning of a knotless soft-tissue fixation repair under direct visualization.

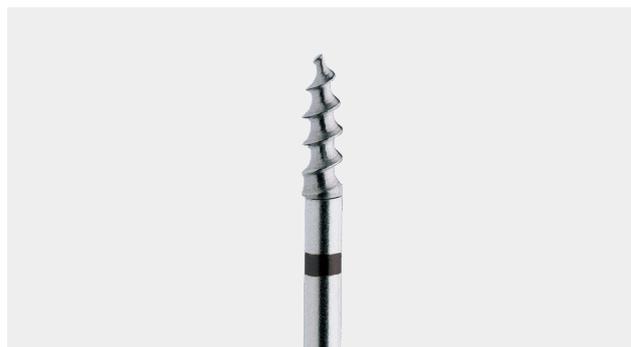

Product Description	Item Number
Biocomposite, 3 mm × 12.7 mm, w/ #2 suture	AR-1938BC
PEEK, 3 mm × 12.7 mm, w/ #2 suture	AR-1938PS
Required Instruments	
Spear and Sharp and Blunt Obturators	AR-1949
2.6 mm Drill, hard bone, sterile	AR-1938D
Disposable Kits	
Disposables Kit Includes spear, drill, and cutter	AR-1938DS
Percutaneous Insertion Kit Includes disposable 17-ga spinal needle, 1.1 mm nitinol wire, portal dilator, spear, drill, PEEK cannula, and cutter	AR-1938PK
Optional Instruments	
Suture Tensioner and Cutter	AR-1938TC
Drill, very hard bone, sterile	AR-1938DL
ShaverDrill™ Accessory, hard bone	AR-1938DSR
Disposable ShaverDrill Kit, hard bone, 5/pack	AR-1938DSSK
For Open Procedures	
Biocomposite, 3 mm × 12.7 mm, w/ #2 suture	AR-1938BCS
PEEK, 3 mm × 12.7 mm, w/ #2 suture	AR-1938PSS
Disposable Kit Includes step drill and spear	AR-1938DSS

Literature

Product Description	Item Number
Knotless SutureTak® anchor Instability Repair Surgical Technique	LT1-0511-EN

FASTak™ Suture Anchor

Titanium FASTak suture anchors come preloaded with #2 FiberWire® suture. In most cases, the implant can be manually inserted using the handled version. A drill is available for use in hard bone if desired.

Product Description	Item Number
2.8 mm × 11.7 mm, w/ #2 FiberWire suture and handle	AR-1324HF
2.8 mm × 11.7 mm, w/ #2 FiberWire suture	AR-1324SF
Drill for 2.8 mm FASTak II anchor	AR-1324D

Spears

Spears with removable trocar and V-shaped tips allow precise control and accurate anatomical placement of the suture anchors on the glenoid rim, in one simple step. The small-diameter shaft with trocar facilitates percutaneous anchor placement without using a cannula for SLAP repairs or a direct approach through the subscapularis.

Product Description	Item Number
Spear and Sharp and Blunt Obturators for 2.8 mm FASTak™ II, 3 mm SutureTak®, and 2.4 mm and 2.9 mm PushLock® anchors	AR-1949
Disposable Spear and Sharp Obturator for 2.8 mm FASTak II, 3 mm SutureTak, 2.4 mm and 2.9 mm PushLock anchors, single use	AR-1949S
Circumferential Teeth Spear and Sharp Obturator for 2.8 mm FASTak II, 3 mm SutureTak, and 2.4 mm and 2.9 mm PushLock anchors	AR-1946
Spear and Sharp and Blunt Obturators for FiberTak®, 2.4 mm FASTak, and 2.4 mm SutureTak anchors	AR-1948
Circumferential Teeth Spear and Sharp Obturator for FiberTak, 2.4 mm FASTak, and 2.4 mm SutureTak anchors	AR-1948CT
Fishmouth Spear for FiberTak and Knotless FiberTak anchors	AR-3610F
Circumferential Teeth Spear for FiberTak and Knotless FiberTak anchors	AR-3610CT
Curved Circumferential Teeth Spear and Flexible Trocar for FiberTak and Knotless FiberTak anchors	AR-3610CTC
Tight Curved Circumferential Teeth Spear and Flexible Trocar for FiberTak and Knotless FiberTak anchors (a)	AR-3610CTC-2
Slotted Spear for FiberTak and Knotless FiberTak anchors (b)	AR-3610ST
Spear and Sharp Obturator for 3.5 mm PushLock and 3.5 mm SwiveLock anchors (c)	AR-1907
Circumferential Teeth Spear and Sharp Obturator for 3.5 mm PushLock and 3.5 mm SwiveLock® anchors (d)	AR-1906
Spear and Sharp and Blunt Obturators for 2 mm SutureTak anchors	AR-1986
Slotted Spear w/ Dilator for 3.9 mm Knotless Corkscrew anchor (e)	AR-1941DG
Fishmouth Spear w/ sharp obturator for 3.9 mm Knotless Corkscrew and 2.6 FiberTak anchors	AR-1941DGF
Circumferential Teeth Spear w/ Sharp Obturator for 3.9 mm Knotless Corkscrew® and 2.6 FiberTak anchors	AR-1941CT
Angled Spear w/ Circumferential Teeth 2.6 FiberTak anchors (f)	AR-3655

Offset Guide

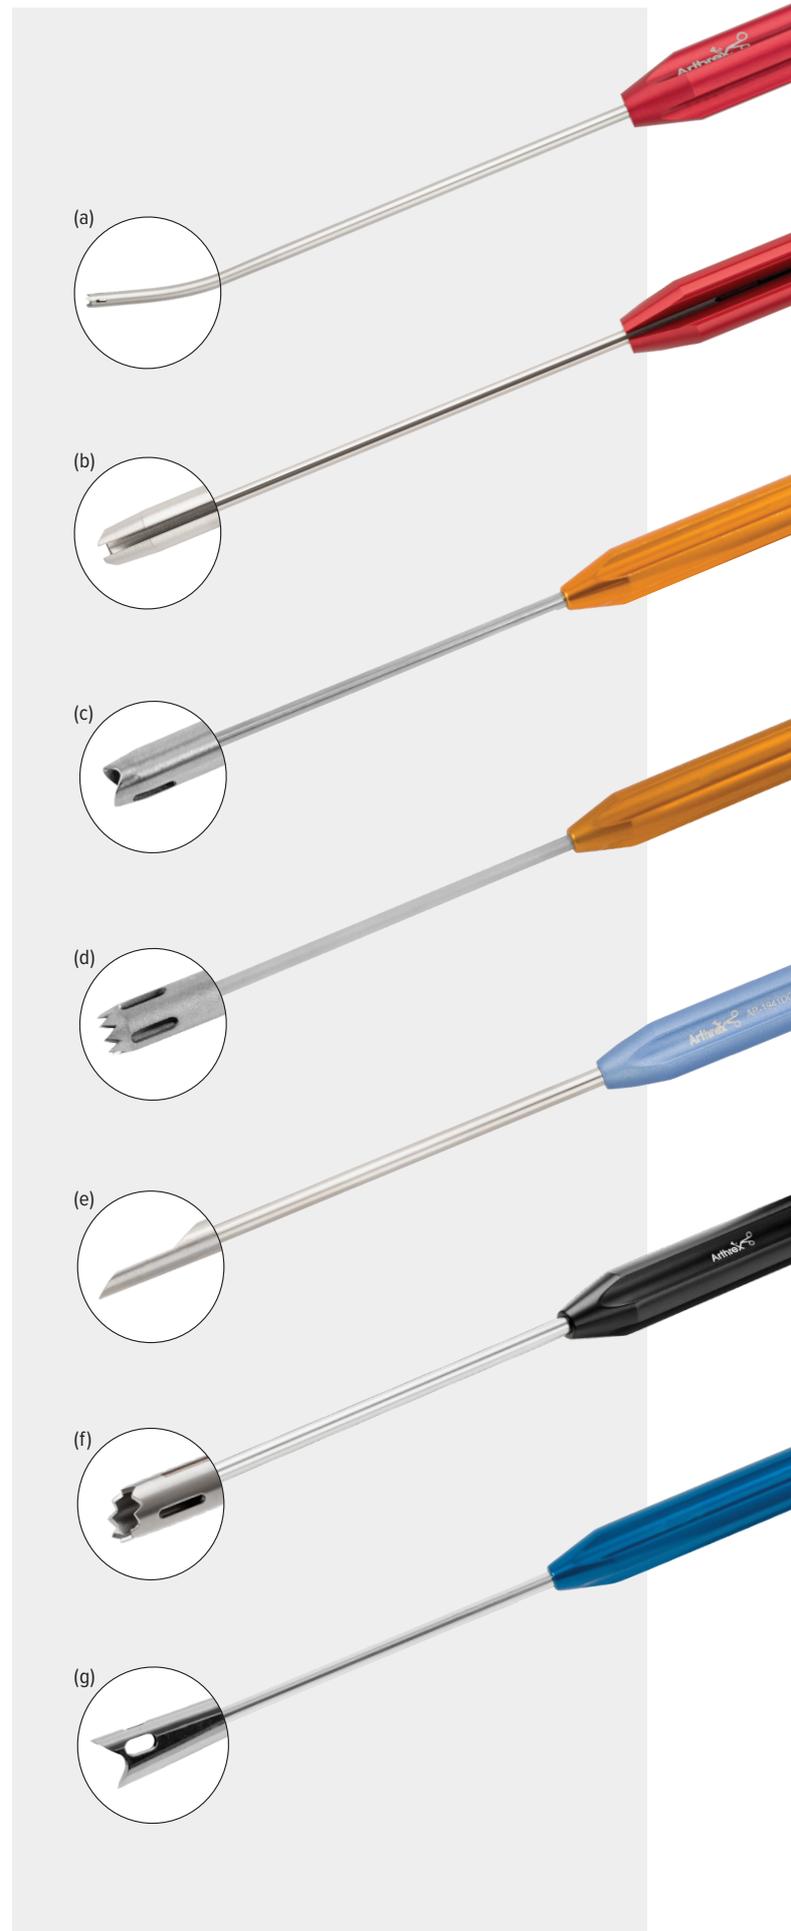

The offset guides allow surgeons to accurately position suture anchor implants on the glenoid for anatomic reconstruction of glenohumeral ligament structures during Bankart and SLAP repairs. All offset guides enable surgeons to easily reproduce a 1.5 mm medial offset position relative to the glenoid rim to complete an anatomic reconstruction of the labral tissue.

Product Description	Item Number
Offset Guide for 3.5 mm PushLock® and 3.5 mm SwiveLock® anchors (g)	AR-1909R
Offset Guide for 2.8 mm FASTak™ II, 3 mm SutureTak®, and 2.4 mm and 2.9 mm PushLock® anchors	AR-1934R
Offset Guide for FiberTak®, 2.4 mm FASTak, and 2.4 mm SutureTak anchors	AR-1948R
Disposable Offset Guide for 2.8 mm FASTak II, 3 mm SutureTak, and 2.4 mm and 2.9 mm PushLock anchors	AR-1934GS

Cannulated Guide

Cannulated guides are designed for inserting anchors during open or arthroscopic Bankart repairs. These guides have a larger wall thickness than the spears to increase instrument strength; the guides also include a larger dovetail tip.

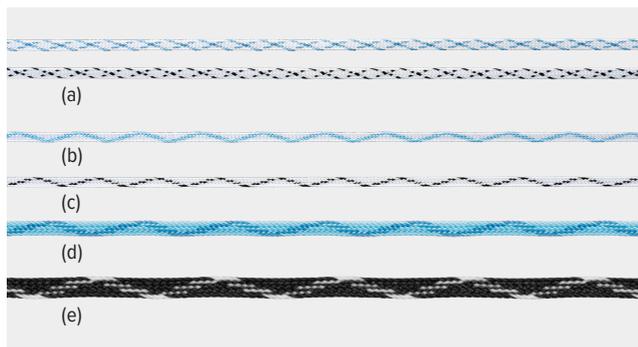

Product Description	Item Number
Cannulated Guide for 2.8 mm FASTak II, 3 mm SutureTak, and 2.4 mm and 2.9 mm PushLock anchors	AR-1317

SutureTape Suture

SutureTape is a flat-braided suture that is similar in strength to #2 FiberWire® suture, but is 21% more resistant to tissue pull-through.¹ It offers improved handling and knot security and smaller comparable knot stacks.

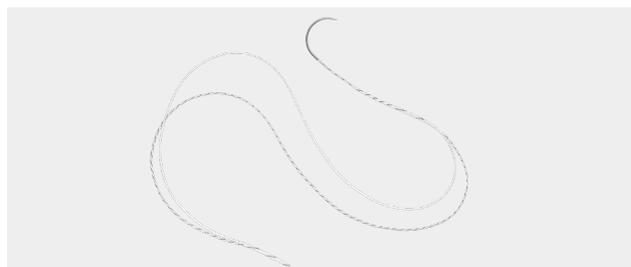

Product Description	Item Number
SutureTape, 1.3 mm, 40 in (white/blue), w/ tapered ends and tapered needle, 26.5 mm, ½ circle (b)	AR-7500
SutureTape, 1.3 mm, 40 in (white/black) w/ tapered ends and tapered needle, 26.5 mm, 1/2 circle	AR-7500T
SutureTape, X-pattern, 1.3 mm, 2 each 40 in strands (1 white/blue, 1 white/black) (a)	AR-7501
SutureTape, 1.3 mm, 40 in (white/blue), w/ reverse cutting needle, 36.6 mm, ½ circle	AR-7502
SutureTape, 1.3 mm, 40 in (blue), w/ tapered needle, 36.6 mm, ½ circle (d)	AR-7506
SutureTape, 1.3 mm, 40 in (black/white), w/ tapered needle, 36.6 mm, ½ circle (e)	AR-7506T
FiberStick SutureTape, 1.3 mm, white/blue, one end stiff 12"	AR-7509*
FiberStick SutureTape, 1.3 mm, white/black, one end stiff 12"	AR-7509T*
SutureTape, 1.7 mm, 38 in (white/blue), w/ conventional cutting needle, 48 mm, ½ circle	AR-7511
SutureTape, 1.7 mm, 38 in (white/black) w/ conventional cutting needle, 48 mm 1/2 circle	AR-7511T
SutureTape, 0.9 mm, 38 in (white/blue)	AR-7521
FiberLoop® SutureTape, 1.3 mm, 20 in loop (white/blue) w/ 76 mm straight needle	AR-7534
TigerLoop™ SutureTape, 1.3 mm, 20 in loop (white/black) w/ 76 mm straight needle (c)	AR-7534T
FiberLink™ SutureTape, 1.3 mm, w/ loop (white/blue)	AR-7535
TigerLink™ SutureTape, 1.3 mm, w/ loop (white/black)	AR-7535T
FiberLink SutureTape, 1.7 mm w/ loop (white/blue)	AR-7538
TigerLink SutureTape, 1.7 mm w/ loop (white/black)	AR-7538T

SutureTag

The SutureTag looping stitch creates a running ripstop to reinforce the tendon with minimal passes through the tissue. This novel stitch is lower profile, faster to complete, and stronger than a typical Krackow repair stitch. The SutureTag splits into two #2 sutures that can be easily incorporated into the FiberTak® button repair technique.

Product Description	Item Number
SutureTag w/ double 14 in #2 tails and 36.6 mm ½ circle tapered needle (white/black)	AR-7274T
SutureTag w/ double 14 in #2 tails and 36.6 mm ½ circle tapered needle (white/blue/black)	AR-7274TT

FiberWire® and TigerWire® Sutures

FiberWire suture is constructed of a multistranded long chain ultra-high-molecular weight polyethylene (UHMWPE) core with a braided jacket of polyester and UHMWPE that gives FiberWire suture superior strength,¹ soft feel, and abrasion resistance² that is unequaled in orthopedic surgery. Suture breakage during knot tying is virtually eliminated, especially critical during arthroscopic procedures.³

Product Description	Item Number
#5 FiberWire Suture, 38 in (blue)	AR-7210
#5 FiberWire Suture, 38 in (blue) w/ conventional cutting needle, 48 mm, ½ circle	AR-7211

FiberWire suture Kit	AR-7219

Includes four #5 FiberWire (blue), four #5 FiberWire (white), four #5 FiberWire (white/black), and six #2 FiberWire (blue) sutures w/ tapered needle and 3 free needles

Collagen-Coated FiberWire Suture

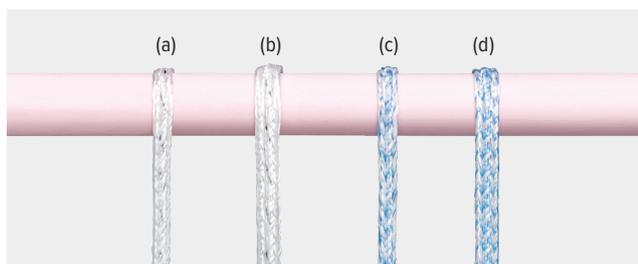

Collagen-coated FiberWire suture is coated with type I bovine collagen, offering a softer coating and improved handling characteristics. These sutures are ideal for knotted and knotless repairs.

Product Description	Item Number
#2 FiberWire Suture, 38 in w/ tapered needle, 26.5 mm, ½ circle, collagen-coated	AR-7200B
#2 FiberLoop® Suture w/ straight needle, 20 in (blue), 76 mm needle w/ 7 mm loop, collagen-coated	AR-7234B
FiberTape® Suture, 2 mm, 7 in (blue) tape w/ each end tapered to #2 FiberWire suture, 30 in, collagen-coated	AR-7237-7B

FiberTape® Suture

Ultra-high-strength 2 mm and 1.7 mm FiberTape sutures have a similar long-chain polyethylene structure as FiberWire® suture. In addition to high-demand applications, like AC joint reconstruction, the broad footprint of FiberTape suture is ideal for repairs where tissue pull-through may be a concern.

Product Description	Item Number
FiberTape Suture, 2 mm, 36 in (blue), each end tapered to #2 FiberWire suture	AR-7237
FiberTape Suture, 2 mm, 7 in (blue), each end tapered to #2 FiberWire suture (d)	AR-7237-7
FiberTape Suture, 2 mm, 7 in (blue), each end tapered to #2 FiberWire suture, collagen-coated	AR-7237-7B
FiberTape Suture, 2 mm, 17 in (blue), each end tapered to #2 FiberWire suture w/ tapered needle 26.5 mm, ½ circle	AR-7237-17N
TigerTape™ Suture, 2 mm, 7 in (white/black), each end tapered to #2 FiberWire suture (b)	AR-7237-7T

TigerTape Loop, 2 mm, 8 in (white/black), tapered to #2 TigerWire® suture	AR-7275T

LabralTape™ Suture

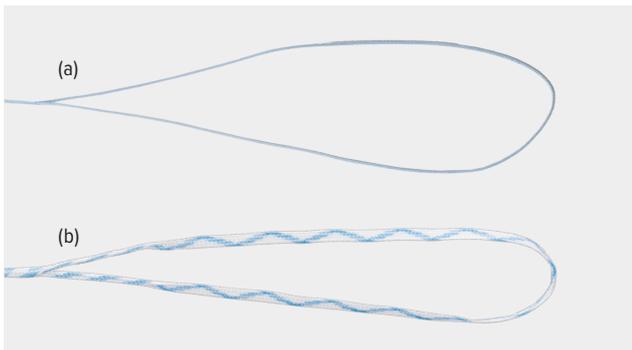

This smooth, low-profile 1.5 mm specialty tape made from polyethylene, provides a wider footprint, and is 37% more resistant to tissue pull-through compared to a #2 suture.¹ LabralTape suture is ideal for the restoration of labral height in instability repairs.

Product Description	Item Number
LabralTape Suture, 1.5 mm, 36 in (white)	AR-7276
LabralTape Suture, 1.5 mm, 36 in (white/black)	AR-7276T

FiberLink™ and TigerLink™ Suture

FiberLink suture is constructed from blue #2 suture and transitions from a single strand to an extended loop. This design is intended to allow 2 single strands of suture within a “cinch” stitch to gain purchase around tissue, while only managing one strand through the PushLock® anchor.

Product Description	Item Number
FiberLink Suture, #2 FiberWire® suture w/ loop (blue) (a)	AR-7235
TigerLink Suture, #2 TigerWire® suture w/ loop (white/black)	AR-7235T
FiberLink SutureTape, 1.3 mm, w/ loop (white/blue) (b)	AR-7535
TigerLink SutureTape, 1.3 mm, w/ loop (white/black)	AR-7535T
FiberLink SutureTape, 1.7 mm w/ loop (white/blue)	AR-7538
TigerLink SutureTape, 1.7 mm w/ loop (white/black)	AR-7538T

FiberLoop® Suture

FiberLoop suture is a continuous loop of FiberWire® suture with multiple needle options. The needles are easy to handle and move freely on the suture to recenter themselves after passing through tissue, facilitating even tension.

Product Description	Item Number
#2 FiberLoop® Suture, 20 in (blue), 76 mm straight needle w/ 7 mm loop (a)	AR-7234
#2 FiberLoop Suture, 20 in (blue), 76 mm straight needle w/ 7 mm loop, collagen-coated	AR-7234B
#2 FiberLoop Suture, 20 in (white), 76 mm straight needle w/ 7 mm loop	AR-7234-01
#2 TigerLoop™ Suture, 20 in (white/green), 76 mm straight needle w/ 7 mm loop	AR-7234T
#2 FiberLoop Suture, 20 in (blue) w/ tapered needle, 26.5 mm, ½ circle	AR-7234C
FiberLoop SutureTape, 1.3 mm, 20 in loop (white/blue) w/ 76 mm straight needle	AR-7534
TigerLoop SutureTape, 1.3 mm, 20 in loop (white/black) w/ 76 mm straight needle	AR-7534T
#2 FiberLoop Suture w/ FiberTag® suture (blue), w/ 20 in FiberTape suture w/ 65 mm straight needle	AR-7266
#2 FiberLoop Suture, 20 in (blue), 65 mm straight needle w/ 7 mm loop	AR-7284
0 FiberLoop Suture, 20 in (blue), 76 mm straight needle w/ 7 mm loop	AR-7253
0 TigerLoop Suture, 20 in (white/green), 76 mm straight needle w/ 7 mm loop	AR-7253T

FiberStick™ and TigerStick® Suture

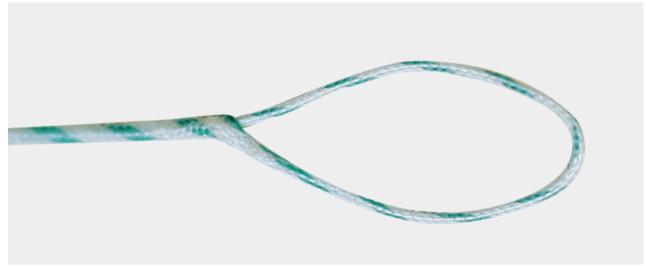

The 12-in stiff “waxed” section of FiberStick suture allows convenient and easy advancement through most cannulated instruments, alleviating the need for a monofilament suture or wire suture shuttle. FiberStick sutures come with a thin plastic tube that helps protect the stiffened suture until use.

Product Description	Item Number
FiberStick Suture, #2 FiberWire® suture, 50 in (blue), one end stiffened, 12 in	AR-7209
TigerStick Suture, #2 TigerWire® suture, 50 in (white/black), one end stiffened, 12 in	AR-7209T
FiberStick SutureTape , 1.3 mm, white/blue, one end stiff 12"	AR-7509*
FiberStick SutureTape , 1.3 mm, white/black, one end stiff 12"	AR-7509T*
2-0 FiberStick Suture, 2-0 FiberWire suture, 50 in (blue), one end stiffened, 12 in	AR-7222

FiberSnare® Suture

FiberSnare suture provides an easy one-step approach to creating a FiberWire® loop on the tip of the tenodesis driver. FiberSnare suture can also be used as a suture shuttle for passage of traction sutures through bone tunnels.

Product Description	Item Number
#2 FiberSnare Suture, #2 FiberWire Suture, 26 in (green) w/ ¾ in closed loop, 12 in stiffened	AR-7209SN

FingerShield™ Finger Guard

Suture slides easily over the finger guard, a woven polyester sleeve with an embedded radiopaque blue marker. The finger guard will stand up to repetitive hand tying during a case without constraining the fingers.

Product Description	Item Number
FingerShield Finger Guard, 2/pk	AR-7199

Free Needles

Product Description	Item Number
Reverse Cutting Needle w/ Nitinol loop, C-13, 36.6 mm, ½ circle	AR-7280
Tapered Needle w/ Nitinol loop, T-5, 26.5 mm, ½ circle	AR-7281
Spring Eye Needle, 60 mm	AR-7283

FiberWire® Suture Cart

A great way to store and organize sutures in one convenient location, the cart also offers additional storage for miscellaneous items. Wheels make it portable and easy to move around the facility.

PassPort Button™ Cannula

PassPort Button cannulas help maximize visibility and maneuverability inside and outside of the arthroscopic workspace. The double-dam, one-piece, molded design has low-profile flanges that seat flush to the skin and soft tissue. The flanges are designed to create a stable portal that allows the insertion and removal of instruments while preventing cannula loss. The PassPort Button cannula with auxiliary lumen adds a convenient side channel for use with NanoScope™ instruments, or suture management. The Passport Divider also aids in suture management by creating divided channels in the 12 mm cannula.

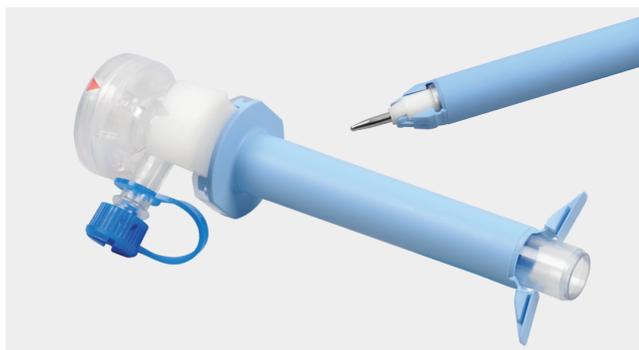

They are easily introduced using the PassPort inserter or by grasping the inside flange with a curved hemostat and inserting into the incision. PassPort Button cannulas can be used for the shoulder, knee, hip, and elbow. Each cannula is supplied with a 5 mm spacer to ensure accurate length.

Gemini™* SR8 Cannula

Gemini SR8 cannulas incorporate a deployable low-profile wing to help prevent cannula “fallout” while inserting and removing instruments during Bankart, SLAP, and rotator cuff repairs. Additionally, the cannula’s inner sleeve can telescope relative to the outer portion of the cannula, providing surgeons a clear, unobstructed channel to the pathology. A disposable cannulated obturator is included for easy insertion over a 2.6 mm switching stick.

Product Description	Item Number
Gemini Cannula, 8.25 mm × 9 cm	AR-6572
Switching Stick, 2.6 mm × 305 mm	AR-6572S

*Gemini is a trademark of Frantz Medical Development Ltd.

Expanula™ Cannula

Arthroscopic rotator cuff repair is easier with the Expanula cannula, which expands the workspace and view. Upon insertion, rotate its outer sheath to expand the distal end of the cannula beneath the deltoid. This design creates an extremely stable portal for inserting and removing instruments while preventing cannula loss. Each cannula is supplied with a “no-squirt” cap and disposable obturator.

Product Description	Item Number
Expanula Cannula, 8.25 mm ID × 7.5 cm	AR-6569

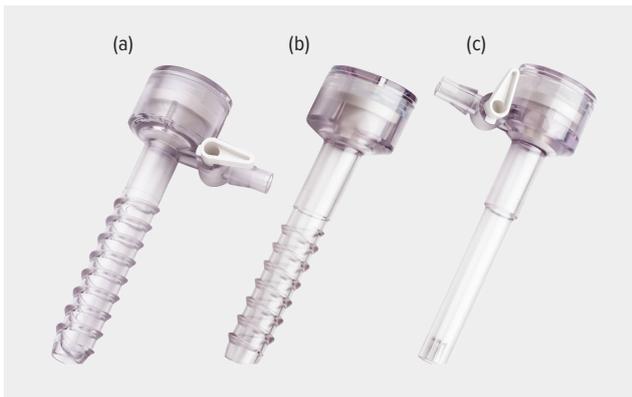

Shoehorn Cannula

The Shoehorn cannula has a longitudinal slot on top of the cannula for introducing oversized instruments. Each cannula is supplied with a disposable obturator.

Product Description	Item Number
Shoehorn Cannula, 6 mm ID × 9 cm	AR-6565

Triple-Dam Twist-In™ Cannulas

This cannula's unique, 3-dam design allows instrumentation and implants to be passed arthroscopically. Additionally, it maintains pressurization for a clear visual fluid environment while minimizing squirting. The side port offers a luer lock connection and a valve switch for manual adjustment of fluid outflow and inflow.

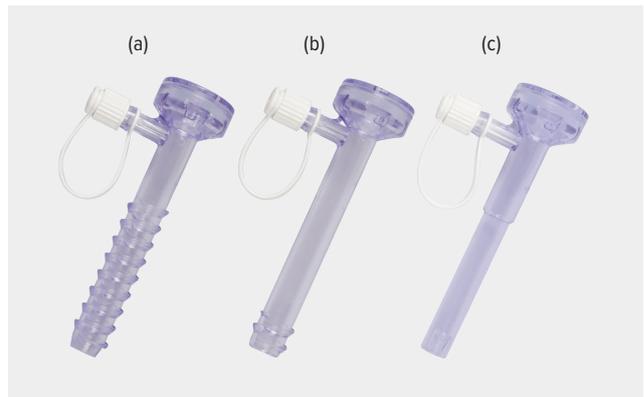

Product Description	Item Number
Triple-Dam Twist-In Cannula, 8.25 mm ID × 7 cm	AR-6530TD
Triple-Dam Twist-In Cannula, 7 mm ID × 7 cm (a)	AR-6570TD

Twist-In™ Cannulas

The translucent Twist-In cannula allows direct arthroscopic visualization of instruments and suture passing through the cannula. A flexible option easily conforms to large or curved instruments. Each cannula is supplied with a “no-squirt” cap and disposable obturator.

Product Description	Item Number
Twist-In Cannula, 8.25 mm ID × 7 cm, notched	AR-6530N
Twist-In Cannula, 8.25 mm ID × 7 cm	AR-6530
Twist-In Cannula, 8.25 mm ID × 9 cm	AR-6540
Twist-In Cannula, 7 mm ID × 7 cm (a)	AR-6570
Twist-In Cannula, 7 mm ID × 7 cm, flexible	AR-6570F
Twist-In Cannula, 6 mm ID × 7 cm	AR-6535
Twist-In Cannula, 6 mm ID × 9 cm	AR-6545
Partially Threaded Cannula, 8.25 mm ID × 7 cm	AR-6566
Partially Threaded Cannula, 8.25 mm ID × 9 cm	AR-6575-09
Partially Threaded Cannula, 8.25 mm ID × 11 cm	AR-6575-11
Partially Threaded Cannula, 7 mm ID × 7 cm (b)	AR-6567
Instrument Cannula, 5.5 mm ID × 9 cm	AR-6532
Instrument Cannula, 7 mm ID × 7 cm (c)	AR-6550

Crystal Cannula® Cannulas

The Crystal Cannula® cannula offers a unique barrel-shaped retention bowl that pools fluid to eliminate cannula “squirt.” Three atraumatic distal retaining options help to prevent cannula “fallout.” A flexible option easily conforms to large or curved instruments. Each cannula is supplied with a disposable orange obturator.

Product Description	Item Number
5.75 mm ID × 7 cm, distal ring	AR-6560
5.75 mm ID × 7 cm, smooth	AR-6562
5.75 mm ID × 7 cm, partially threaded	AR-6564
5.75 mm ID × 7 cm, flexible, distal ring	AR-6560F
5.75 mm ID × 5 cm, partially threaded, short	AR-6568

Low-Profile 5 mm Cannula

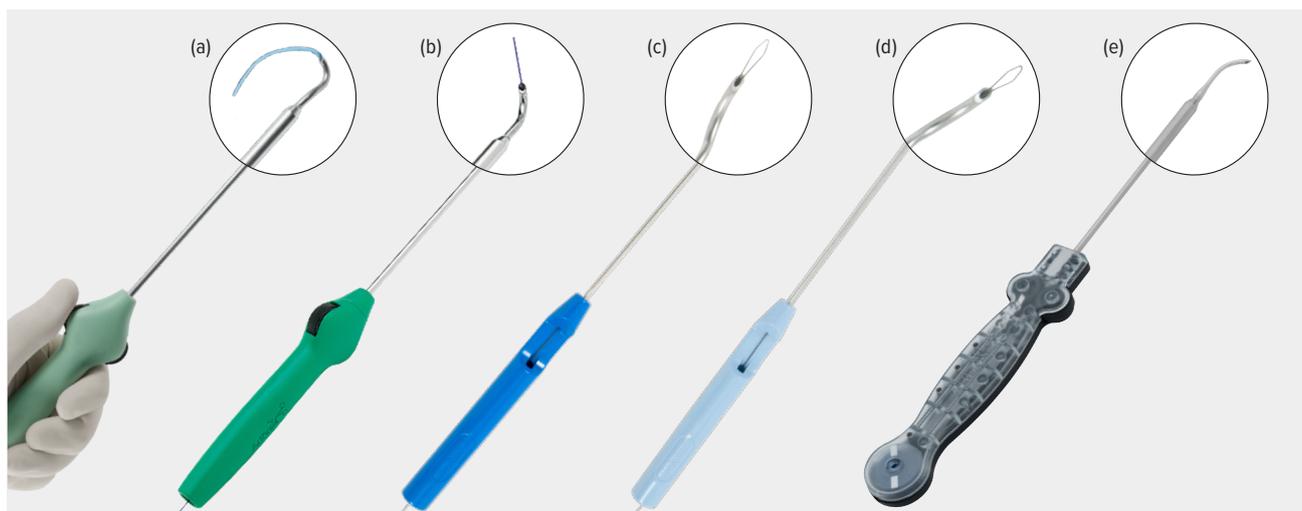

This 5 mm cannula is the lowest profile cannula on the market that allows for direct visualization of instruments and suture passing. The proximal portion of the cannula is similar to the Crystal Cannula cannula. Each cannula is supplied with a disposable blue obturator.

SutureLasso™ Suture Passers

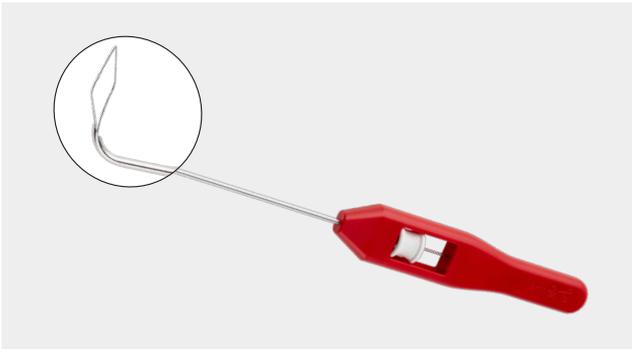

The SutureLasso SD suture passers feature a thumb pad and the QuickPass™ SutureLasso suture passers use thumbwheels to quickly and easily advance the supplied nitinol wire loop, a #2 FiberStick™ suture, or a monofilament (PDS) suture. The small, 1.8 mm-diameter tip provides atraumatic suture passage and is sterile for single-patient use, which ensures a sharp instrument every time.

ReelPass SutureLasso™ suture passers contain 10 yd of blue #1 nonabsorbable monofilament to provide a continuous supply without the need to reload. The ergonomic handle and thumbwheels were designed to easily advance the monofilament. This single-use device has a 1.5 mm-diameter tip that is the smallest on the market and is always sharp.

Rotation Lasso Suture Passer

The Rotation Lasso suture passer features a rotating and steerable loop for arthroscopic and open soft-tissue repair. The simplicity of the design helps reduce procedural steps, prevents twists and tangles inside cannulas, and eliminates the need for outside suture shuttling.

Product Description	Item Number
Rotation Lasso Suture Passer, 90°	AR-6065-90

Transosseous Suture Passer

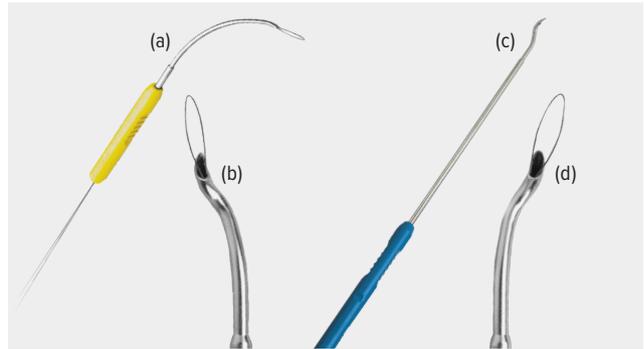

The transosseous suture passer comes sterile and features a 6-inch malleable shaft, a durable nitinol capture loop, and a comfortable handle. Applications for this instrument include any passing of grafts or suture through bony sockets and tunnels.

Product Description	Item Number
Transosseous Suture Passer	AR-1000

Lasso Suture Passers Brochure	LB1-000382-en-US

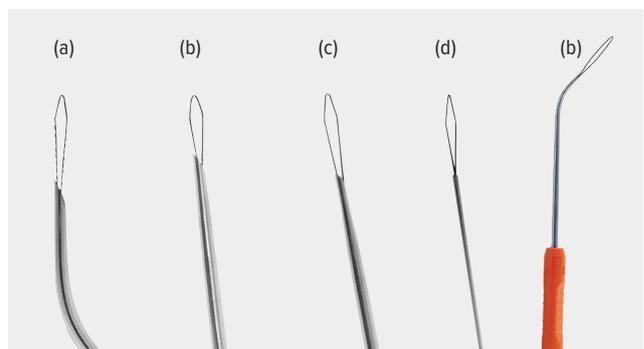

SutureLasso™ Suture Passer

These passers have various curved-tip configurations for arthroscopic Bankart, SLAP, and rotator cuff repairs. Each suture passer has a 2.3 mm outer diameter tip and comes preloaded with a nitinol loop to simplify shuttling and passing suture through tissue. The Banana SutureLasso™ suture passer is designed for passing sutures through the rotator cuff via a superior, percutaneous approach (modified Neviaser portal) or along the acromial border.

Micro SutureLasso™ Suture Passer

These 1.25 mm-diameter instruments work well for percutaneous suture passing during rotator cuff and glenoid labrum repairs.

Product Description	Item Number
Minor bend (b)	AR-8701
Major bend (a)	AR-8702
Straight (c)	AR-8703
Micro SutureLasso Retriever (d)	AR-8701SR

FastPass Scorpion™ SL Suture Passer

The FastPass Scorpion SL suture passer simplifies antegrade suture passing by loading the suture from the side, preventing suture and soft tissue interference during suture passing. The low-profile design fits down a 6 mm cannula and the top jaw mechanism helps pass and retrieve FiberWire® sutures in one step.

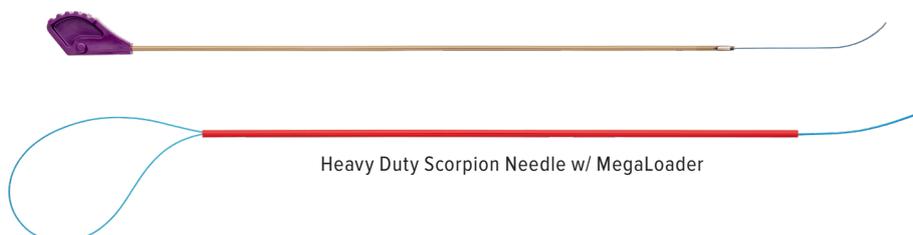

Product Description	Item Number
FastPass Scorpion SL Suture Passer	AR-13999MF
HD Scorpion Needle w/ MegaLoader, 5/box	AR-13999HDN
SCORPION-multifire Needle, 5/box	AR-13995N

SCORPION-multifire Suture Passer

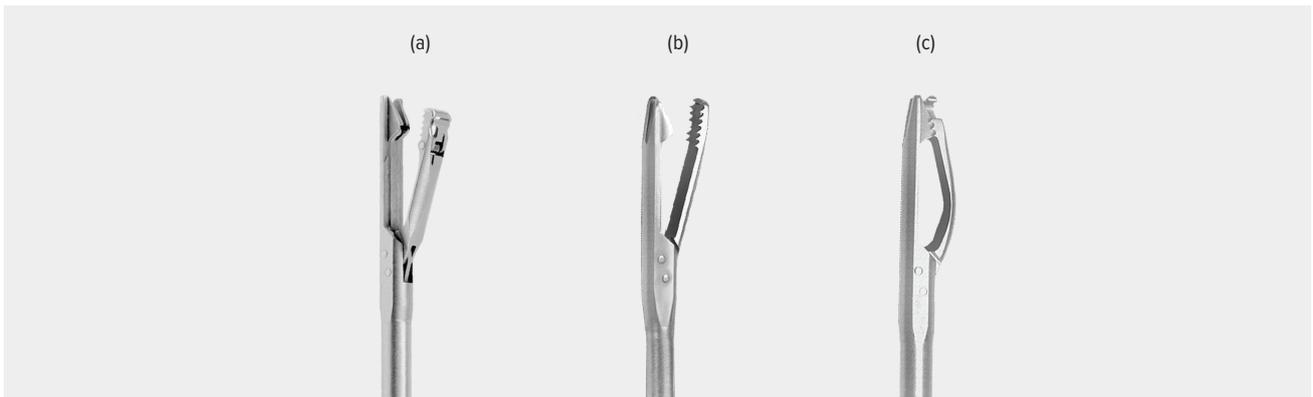

With the FastPass SCORPION-multifire suture passer, surgeons can load 2 sutures outside and independently pass 2 sutures inside. The low-profile designs of the humpback and straight suture passers fit down 7 mm and 6 mm cannulas, respectively. The FastPass upper jaw helps pass and retrieve FiberWire® suture in one step.

Product Description	Item Number

Heavy Duty Scorpion Needle w/ MegaLoader

Scorpion™ Suture Passer

The FastPass Scorpion suture passer grasps cuff tissue then directly passes and retrieves FiberWire® suture. Scorpion suture passers grasp 16 mm of tissue and fit through a 6 mm cannula. A “humpback” version is available for use in thicker rotator cuff tissue and requires a 7 mm cannula.

Product Description	Item Number
FastPass Scorpion Suture Passer (a)	AR-13997SF
Scorpion Suture Passer (b)	AR-13990
Scorpion Suture Passer, humpback (c)	AR-13993
Scorpion Needle, 5/box	AR-13990N
SureFire® Scorpion Needle, 5/box	AR-13991N

Labral Scorpion Suture Passer

Pass and retrieve #2 FiberWire® suture in the labrum using the Labral Scorpion QL suture passer. Its quickloading bottom jaw and suture-retrieving top jaw are designed for simplicity and easy use, supporting more successful suture passes. The Labral Scorpion suture passer’s streamlined, low-profile jaws are designed to maneuver around the glenohumeral space and fit through a 6 mm cannula. Use the Labral Scorpion suture passer through a single portal to self-retrieve sutures with the upper jaw’s capturing mechanism.

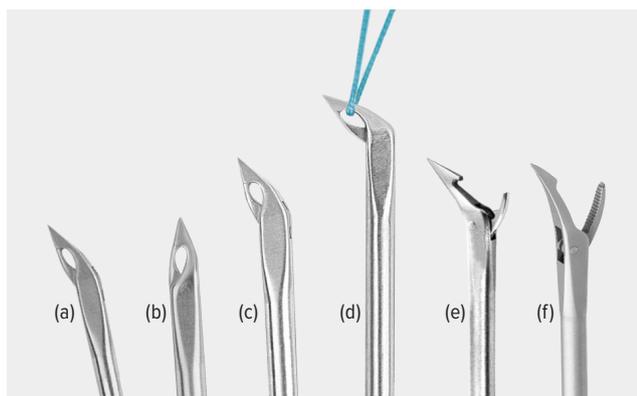

Product Description	Item Number

SureFire Scorpion Needle, 5/box	AR-13991N

The Labral Scorpion suture passer is ONLY compatible with the SureFire Scorpion needle.

BirdBeak® Suture Passer

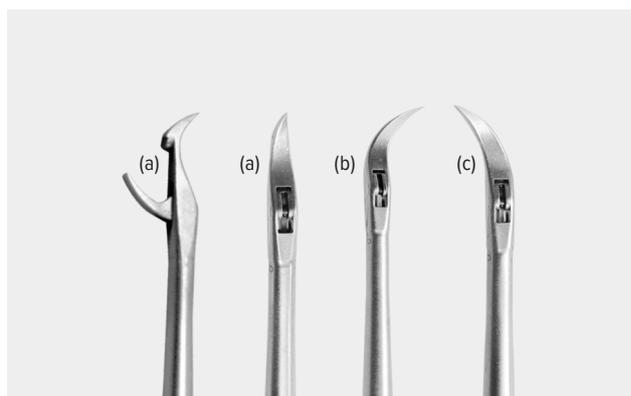

BirdBeak suture passers have an extremely sharp tip to penetrate soft tissue easily and a stiff shaft that resists bending during tissue-shifting procedures. BirdBeak suture retriever devices are an essential tool for arthroscopic labral, SLAP, and rotator cuff repairs. The BirdBeak Evolution suture passer has a uniquely designed handle that allows for easy operation from virtually any hand position.

Product Description	Item Number
BirdBeak Suture Passer, 45° up tip (d)	AR-11800
BirdBeak Suture Passer, 22° up tip (c)	AR-11890

Grasping BirdBeak Suture Passer, 22° up curve w/ SR handle (f)	AR-11810SR

Inverted BirdBeaks

Product Description	Item Number
BirdBeak Suture Passer, 45° up tip, inverted jaw w/ WishBone™ handle (e)	AR-11805W
BirdBeak Suture Passer, 22° up tip, inverted jaw w/ WishBone™ handle	AR-11895W

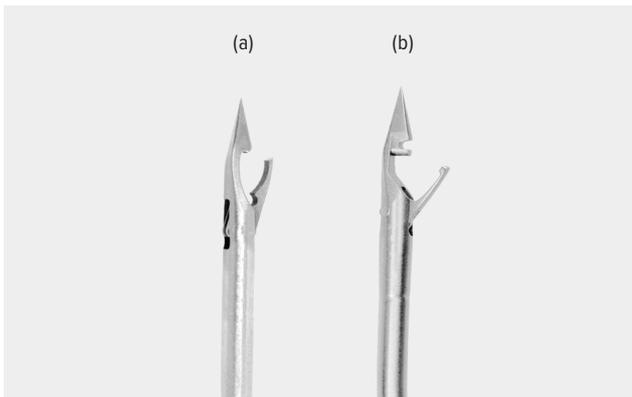

Rhino Suture Passers

Rhino suture passers have an extremely sharp, small-diameter upturned tip that will easily penetrate soft tissue. The ridged 3.4 mm shaft resists bending and flexing during tissue-shifting procedures. The novel bottom opening jaw design is conveniently positioned to capture the suture from an anchor, eliminating the need to rotate the instrument.

Product Description	Item Number
Straight (a)	AR-11850SR
Left curve (c)	AR-11852SR
Right curve (b)	AR-11851SR
Straight, w/ WishBone handle	AR-11850W

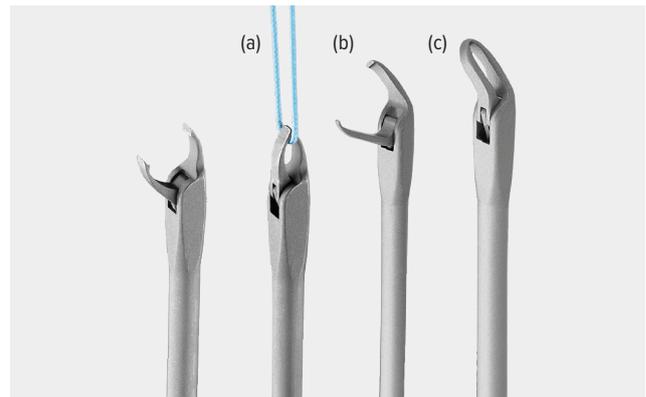

Penetrator™ Suture Retriever

This unique instrument combines a small penetrating tip with a suture grasper to allow suture delivery or extraction in one step. The 2.7 mm-diameter tip slides easily through the tissue with the suture either sliding or grasped within the self-ratcheting mechanism. This device is ideal for instability and rotator cuff repairs.

Product Description	Item Number
Penetrator Suture Retriever, 15° up curved	AR-2167-2
Penetrator Suture Retriever, straight (a)	AR-2167ST-2
Penetrator FiberTape® Suture Retriever, 15° up curved	AR-2167-3
Penetrator FiberTape Suture Retriever, straight (b)	AR-2167ST-3
Penetrator FiberTape Suture Retriever, 15° up curved w/ WishBone™ handle	AR-2167W-3
Penetrator FiberTape Suture Retriever, straight w/ WishBone handle	AR-2167STW-3

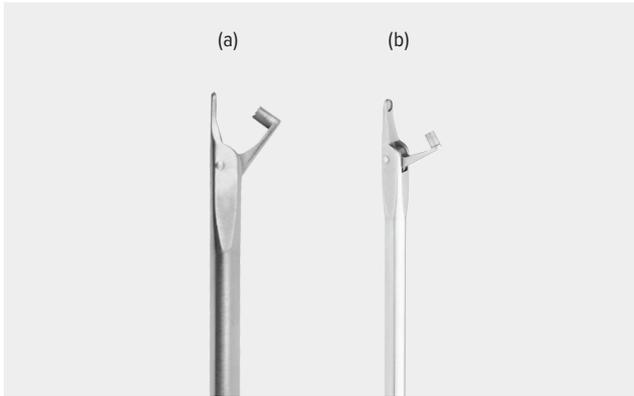

Suture Retriever

The suture retriever is designed for atraumatic suture retrieval and manipulation during arthroscopic procedures. The jaws create a closed loop that allows suture to slide freely during suture extraction. The uniquely designed tip is made to spread parallel strands of suture and facilitate retrieval. Its small diameter and low profile allow access into the tightest joint spaces. The tip angle on the 45° suture retriever allows access to suture strands in deep, hard-to-reach spaces.

Product Description	Item Number
Suture Retriever, 3.4 mm, straight (a)	AR-12540
Suture Retriever, 3.4 mm, 15° up	AR-12550
Suture Retriever, 3.4 mm, 45° right (b)	AR-12580

Rotator Cuff Grasper

The low-profile 4 mm tip was specifically designed to securely grasp the tendon and pull it into the proper anatomic position. This instrument also features an ergonomic ring handle with a tip-locking mechanism.

Product Description	Item Number
Rotator Cuff Grasper w/ SR handle	AR-13960SR
Rotator Cuff Grasper w/ NR handle	AR-13960NR
Rotator Cuff Grasper w/ WishBone™ handle	AR-13960W

FiberWire® Grasper

The FiberWire grasper is designed to grasp and retrieve multiple strands of FiberWire suture. This fully toothed design and long jaw assembly provides a substantial working range for easily grabbing suture within the glenohumeral or subacromial joint space.

Product Description	Item Number
FiberWire Grasper w/ NR handle	AR-13975NR
FiberWire Grasper w/ SR handle	AR-13975SR
FiberWire Grasper w/ WishBone™ handle	AR-13975W

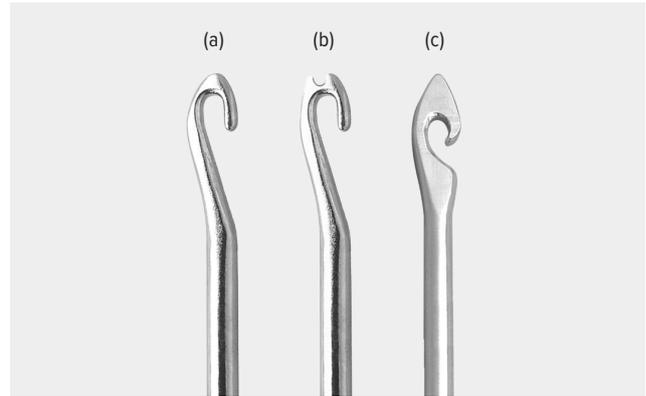

Back Grasper

The back grasper is a simple but effective tool to aid introducing grafts, implants, and instruments into the body.

Product Description	Item Number
Back Grasper w/ NR handle	AR-12531NR
Back Grasper w/ SR handle	AR-12531SR
Back Grasper w/ WishBone™ handle	AR-12531W

Crochet Hook

The crochet hook is a simple tool that performs well in tight spaces to retrieve suture loops during arthroscopic Bankart, SLAP, and rotator cuff repairs, or any suturing procedure. The smooth tip prevents abrasion of suture strands and the ergonomic, knurled handle facilitates instrument manipulation in the wet arthroscopic environment. The push/pull crochet hook was designed to push suture knots and/or retrieve suture with the same instrument.

Product Description	Item Number
Crochet Hook (a)	AR-5008H
Push/Pull Crochet Hook (b)	AR-5009H
Suture Hook (c)	AR-5007H

SCR Guide

The SCR Guide helps simply and reproducibly estimate the distances between suture anchors during superior capsular reconstruction (SCR). This reusable hand instrument's suture-retrieving jaw is designed for both suture and FiberTape® suture. The highlighted black sleeve clearly shows graduations for distances referenced off of sutures.

Product Description	Item Number
SCR Guide	AR-16950SR

Suture Cutters

The suture cutter was designed to facilitate arthroscopic cutting of FiberWire® and braided sutures. The uniquely designed cutting jaws remain sharp throughout repeated use. The suture cutter is available in a closed and open end, left notch version. The closed-end suture cutter allows the surgeon to leave a 3 mm suture tail without the possibility of cutting the knot. The open end, left notch version facilitates suture cutting inside the joint without having to top load the cutter. The FiberTape cutter was designed to allow for flush cutting of 2 FiberTape sutures.

Product Description	Item Number
Suture Cutter, 4.2 mm, straight, closed-end (used w/ #2 and #5 suture) (a)	AR-12250
Suture Cutter, 4.2 mm, straight, closed-end w/ WishBone™ handle	AR-12250W
Suture Cutter, 4.2 mm, open end, left notch (used w/ all suture) (b)	AR-11794L
Suture Cutter, 4.2 mm, w/ WishBone handle, open end, left notch (used w/ all suture)	AR-11794LW
Mini Suture Cutter, 3.4 mm, straight, closed-end (used w/ #2 FiberWire and LabralTape sutures)	AR-13255
Mini Suture Cutter, 3.4 mm, straight, closed-end w/ WishBone handle (used w/ #2 FiberWire and LabralTape™ sutures)	AR-13255W
FiberTape Cutter, 4.2 mm, straight, closed-end	AR-13250
FiberTape Cutter, 4.2 mm, straight, closed-end w/ WishBone handle	AR-13250W
FiberWire Scissor (for open procedures) (c)	AR-11796

CrabClaw™ Knot Pusher/Suture Retriever

The opening rotary jaw of the CrabClaw instrument makes it an effective suture retriever and knot pusher. It allows for intra-articular capture of suture, which dramatically simplifies arthroscopic knot tying. Suture posts are alternated simply by opening the jaws and engaging the parallel suture limb outside the cannula or in the joint. When used as a knot pusher, the ratcheting handle secures the jaw in a closed position to allow for smooth knot advancement.

Product Description	Item Number
CrabClaw Knot Pusher/Suture Retriever	AR-12960

6th Finger™ Knot Pusher

The unique double-tube design allows surgeons to apply and maintain tension to the first throw, while advancing subsequent throws with the sliding plastic outer tube. The inner tube allows subsequent “past pointing” to apply opposite suture tension to the knot similar to open knot tying techniques. A wire loop is incorporated inside the disposable, sterile 6th Finger knot pusher for easy suture loading.

Product Description	Item Number
6th Finger Knot Pusher w/ suture passer, sterile, 5/box	AR-1930S

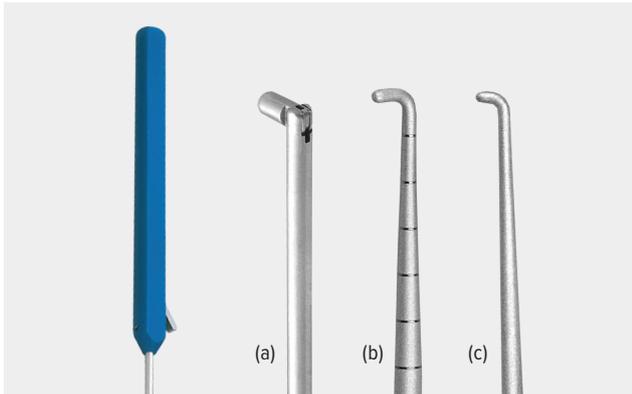

Knot Pusher

The single-hole knot pusher provides a simple method for advancing sliding knots and half-hitches. The closed-end knot pusher has a modified handle that provides an ergonomic feel. The distal tip has also been modified for easier advancement of slip knots and half-hitches.

Product Description	Item Number
Knot Pusher, closed end (a)	AR-1305
Single-Hole Knot Pusher	AR-1299

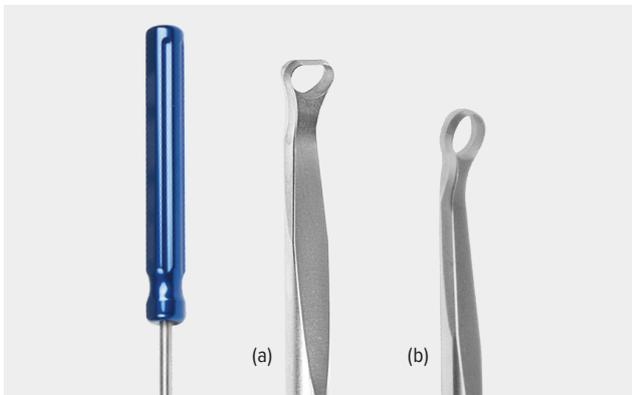

Probes

With the articulating probe, surgeons can easily insert an instrument through a small stab incision in soft tissue with the tip in a straight position. The tip of the probe can then be changed to a locked 90° position to test the strength of a soft tissue repair or to probe defects.

Product Description	Item Number
Articulating Probe (a)	AR-10100
Hook Probe, 5.4 mm (b)	AR-10000
Hook Probe, 3.4 mm (c)	AR-10010

Curettes

Ring curettes are available with one or both sides cut. D-curettes feature a D-shaped, dual-sided cutting ring designed to prepare the articular margin prior to anchor insertion during rotator cuff repair. D-curettes are also an excellent choice for cartilage removal, particularly prior to glenoid placement in total shoulder arthroplasty procedures.

Product Description	Item Number
D-curette, 5.4 mm × 150 mm, both sides cut (a)	AR-22020
D-curette, 3.4 mm × 150 mm, both sides cut	AR-23020
Curette, 5.4 mm ring, one side cut (b)	AR-20010
Curette, 5.4 mm ring, both sides cut	AR-20020

Modular Soft-Tissue Retractor

The modular soft-tissue retractor is a versatile adjunct to muscle-splitting approaches about the shoulder, including mini-open rotator cuff repair. It has a self-locking and self-retaining design with modular paddles that allow firm, yet safe, exposure. Its self-locking design allows the shoulder to be moved throughout a range of motion without the retractor becoming dislodged.

Product Description	Item Number
Modular Soft-Tissue Retractor Body	AR-8170
Modular Soft-Tissue Retractor Set	AR-8170S
Modular Soft-Tissue Retractor Atraumatic Set	AR-8170DS
Modular Soft-Tissue Retractor Atraumatic Paddle Set, 75 mm	AR-8170-75DS

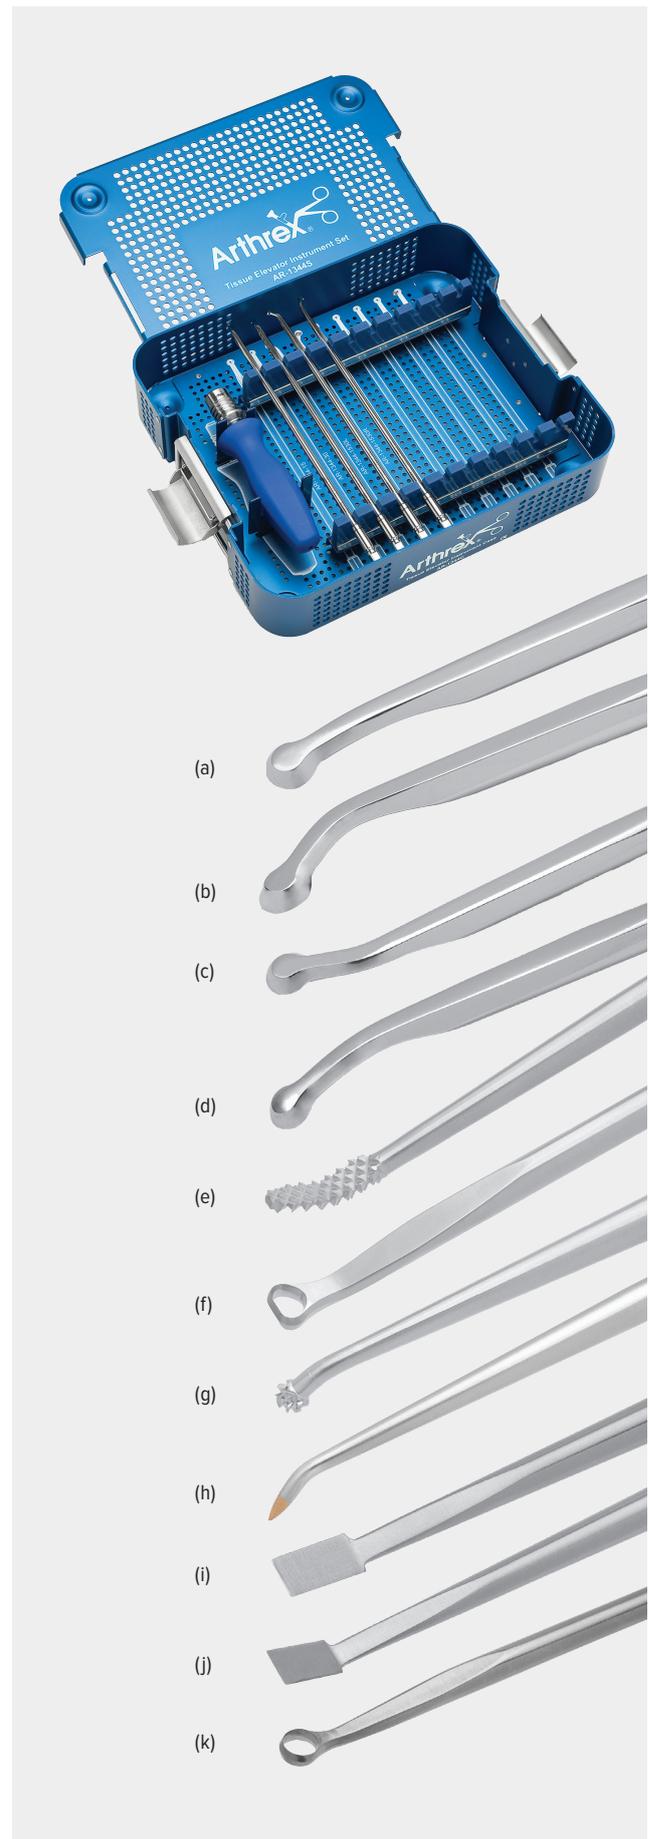

Replacement paddles are available for all sets

Tissue Elevator and Bone Preparation System

The Tissue Elevator and Bone Preparation System combines new tip designs and a modular handle to give you the ultimate selection of tools for work in the glenohumeral joint and subacromial space. A variety of rasps, curettes, tissue elevators, and a chondro pick are provided in one convenient system. The shaft length of each tip is long enough to effectively span the distance from an anterior working portal to the posterior rim of the glenoid, allowing the best possible angle of approach to work with ease and efficiency in this area.

Product Description	Item Number
Tissue Elevator Instrument Set includes	AR-1344S
Quick Connect Handle, ¼ sq. nonratcheting	AR-2003NR

Shoulder Arthroscopy Instrument System

The Shoulder Arthroscopy Instrument System is a modular and customizable instrument system that can accommodate a comprehensive selection of instruments to facilitate arthroscopic shoulder repairs. The configured set contains a selection of the most popular and latest instruments, including a quick-connect system for portal dilation, cannula insertion, and tissue preparation, as determined by leading upper extremity surgeons.

Product Description	Item Number
Shoulder Arthroscopy Instrument System includes	AR-8405S

Loop 'N' Tack™ Biceps Tenodesis

The Loop 'N' Tack technique is a simple approach to arthroscopic biceps tenodesis. The technique allows for suture to be passed and retrieved under direct visualization through the biceps tendon while still attached to the superior labrum. The biceps can be fixated to the tuberosity or incorporated into a rotator cuff repair.

Product Description	Item Number
4.75 Knotless BC SwiveLock w/ HD Scorpion Needle Loop 'N' Tack Tenodesis Implant System Includes 4.75 mm × 19.1 mm Knotless BioComposite SwiveLock anchor, punch, FiberLink SutureTape, and HD Scorpion needle w/MegaLoader	AR-1665KBCSLSN
4.75 Knotless BC Loop 'N' Tack Tenodesis Implant System Includes 4.75 mm × 19.1 mm Knotless BioComposite SwiveLock® anchor, punch, Loop 'N' Tack SwiftStitch™ passer, and FiberLink™ SutureTape	AR-1665KBCSL
4.75 BC SwiveLock w/ HD Scorpion Needle Loop 'N' Tack Tenodesis Implant System Includes 4.75 mm × 19.1 mm BioComposite SwiveLock anchor, punch, FiberLink SutureTape, and HD Scorpion needle w/MegaLoader	AR-1665BCSLSN
4.75 BC Loop 'N' Tack Tenodesis Implant System Includes 4.75 mm × 19.1 mm BioComposite SwiveLock anchor, punch, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665BCSL
3.9 BC SwiveLock w/ HD Scorpion Needle Loop 'N' Tack Tenodesis Implant System Includes 3.9 mm × 17.9 mm BioComposite SwiveLock anchor, punch, FiberLink SutureTape, and HD Scorpion needle w/MegaLoader	AR-1665BCSLSN-39
3.9 BC Loop 'N' Tack Tenodesis Implant System Includes 3.9 mm × 17.9 mm BioComposite SwiveLock anchor, punch, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665BCSL-39
2.9 BC PushLock w/HD Scorpion Needle Loop 'N' Tack Tenodesis Implant System Includes 2.9 mm × 12.5 mm BioComposite short PushLock anchor, spear, trocar, drill, FiberLink SutureTape, and HD Scorpion needle w/ MegaLoader	AR-1665BCPLSN
2.9 BC Loop 'N' Tack Tenodesis Implant System Includes 2.9 mm × 12.5 mm BioComposite short PushLock® anchor, spear, trocar, drill, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665BCPL

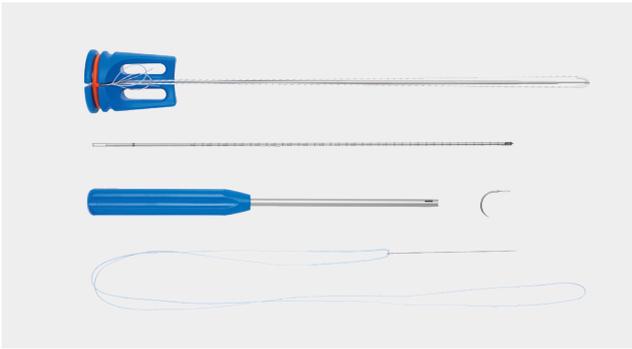

Product Description	Item Number
4.75 Knotless PEEK Loop 'N' Tack Tenodesis Implant System Includes 4.75 mm × 19.1 mm Knotless PEEK SwiveLock anchor, punch, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665KPSL
4.75 PEEK Loop 'N' Tack Tenodesis Implant System Includes 4.75 mm × 19.1 mm PEEK SwiveLock anchor, punch, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665PSL
3.9 PEEK Loop 'N' Tack Tenodesis Implant System Includes 3.9 mm × 17.9 mm PEEK SwiveLock anchor, punch, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665PSL-39
2.9 PEEK Loop 'N' Tack Tenodesis Implant System Includes 2.9 mm × 12.5 mm PEEK short PushLock anchor, spear, trocar, drill, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665PPL

2.6 FiberTak® Button

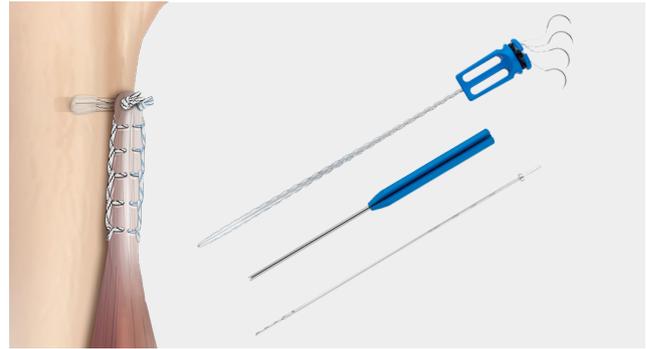

The FiberTak button is an all-suture button that can be used for both bicortical and unicortical tension slide tenodesis techniques. The button is a reinforced 2.6 mm diameter sheath preloaded with two 2-0 FiberLink™ sutures that are used to shuttle the whipstitch limbs through the sheath.

Product Description	Item Number
2.6 FiberTak Button Implant System Includes FiberTak button w/ inserter and double-loaded FiberLink, 2.6 mm spade tip drill, drill guide, #2 FiberLoop® suture, and free needle	AR-3680

Suprapectoral Biceps Tenodesis with the Knotless FiberTak Biceps Anchor Surgical Technique	LT1-000251-en-US

Knotless TensionTight™ Implant System

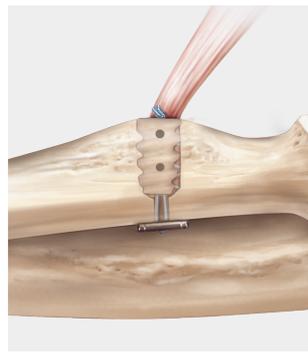

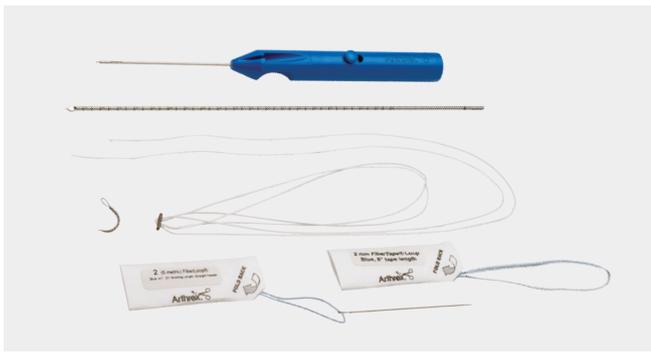

The TensionTight button is used to perform a knotless onlay biceps tenodesis, using either an arthroscopic suprapectoral or open subpectoral approach. A locking jaw in the button allows for a knotless biceps tenodesis. Securing the biceps tendon repair with a Loop 'N' Tack stitch enables an all-arthroscopic suprapect onlay tenodesis.

Product Description	Item Number
Knotless TensionTight Button Implant System Includes Knotless TensionTight Button with inserter, two #5 FiberLink™ sutures, 3.7 mm drill pin, curved needle with nitinol loop, and shoehorn cannula	AR-2350

Distal and Subpectoral Biceps Repair

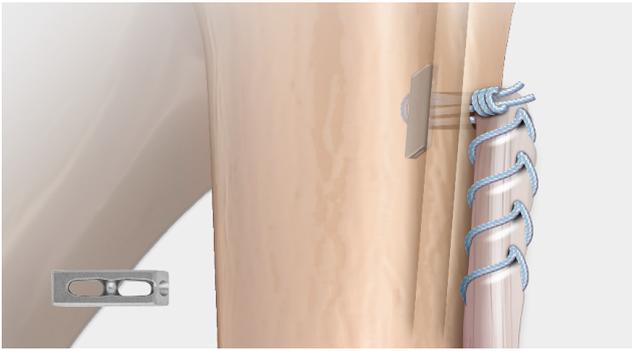

The tension-slide technique with the BicepsButton™ implant system provides surgeons a simple, reproducible, and biomechanically stable distal and proximal biceps repair. This “tensioning” technique draws the tendon against the distal cortex of the bone socket. A tenodesis screw can be added to augment the repair and place the tendon in a more anatomic position.

Proximal Tenodesis Button

The proximal tenodesis button has an angled face to promote a toggle effect when the button contacts the far cortex, making it ideal for unicortical biceps tenodesis.

Product Description	Item Number
Proximal Tenodesis Implant Kit Includes Proximal BicepsButton™ implant, button inserter, FiberLoop® suture, free needles, drill pin, and a shoehorn cannula	AR-2290
Proximal Tenodesis Button, 2.6 mm × 8.5 mm, w/ inserter	AR-2291
#2 FiberLoop® Suture (blue) w/ straight needle	AR-7234
Tapered Needle w/ Nitinol Loop, 26.5 mm, ½ circle	AR-7281
Drill Pin, 3.2 mm, sterile	AR-2263
Shoehorn Cannula	AR-6565

Two-Incision Distal Biceps Implant System

The Two-Incision Distal Biceps Implant System provides everything required to perform a distal biceps repair from a posterior approach using two 7 mm unicortical buttons.

Product Description	Item Number
Two-Incision Distal Biceps implant System Includes two 2.6 mm × 7 mm buttons w/ inserters, two #2 FiberWire® w/ needles (1 blue/white, 1 black/white) 3.2 mm drill pin, flexible obturator, and curved obturator w/ nitinol wire	AR-2295
Two-Incision Tenodesis Button, 2.6 mm × 7 mm	AR-2296
Curved Obturator, cannulated, 3 mm	AR-2294

Pec Button

The pec button and large pec button have an angled face to promote a toggle effect when the button contacts the opposite cortex, making these buttons ideally suited for unicortical repairs, particularly pectoralis major injuries. The large pec button features larger eyelets to accommodate FiberTape® and #5 FiberWire® sutures.

Product Description	Item Number
Pec Button Implant Repair Kit Includes 3 pec buttons w/ FiberWire suture and needles, button inserter, and 3.2 mm drill pin	AR-2268
Pec Button, 2.6 mm × 10.9 mm (a)	AR-2266
Button Inserter	AR-2262

Birmingham Biceps™ Implant System

The Birmingham Biceps Implant System for subpectoral tenodesis was designed to minimize the potential for postoperative humeral fractures by placing a small 5.5 mm PEEK SwiveLock® tenodesis implant near the top of the pectoralis at a newly defined anatomical landmark, the pallium pectoralis. The implant system includes everything needed for the procedure, making it very convenient for surgeon and staff.

Product Description	Item Number
Birmingham Biceps Implant Kit Includes 5.5 mm PEEK SwiveLock anchor, FiberLink Plus™ suture, free needle, 5.5 mm pilot-headed reamer, and 5.8 mm tap	AR-1662S-1

SwiveLock® Tenodesis Implants

The family of SwiveLock tenodesis implants has been designed to support a multitude of proximal biceps tenodesis techniques and maximize OR efficiency. Implants are available with closed eyelets for surgeons who prefer a whipstitching technique and forking eyelet versions are offered for an all-arthroscopic approach.

Elbow Arthroscopy

Elbow Arthroscopy Set	68
Elbow Ulnar Collateral Ligament (UCL) Reconstruction Set	69

Elbow Arthroscopy Set

The Elbow Arthroscopy Instrument Set is the first and only comprehensive set of instruments available for elbow arthroscopy. Precision manufactured to the highest-quality standards and thoughtfully designed around the feedback of leading elbow arthroscopists, the set enables improved portal placement and includes unique instruments designed for tissue retraction/ elevation, microfracture, precise soft-tissue resection with arthroscopic scissors and punches, loose body graspers, osteotomes, and curettes. The previously unreachable and unfixable can now be addressed, opening up new horizons in patient care for elbow pathology.

Product Description	Item Number
Elbow Arthroscopy Set includes	AR-8650S
Osteotome, angled up (a)	AR-1770
Osteotome, straight	AR-1771
Extra Long Switching Stick, 4 mm	AR-3026
Graduated Black Probe, 2.5 mm Tip	AR-5007

Elbow Ulnar Collateral Ligament (UCL) Reconstruction Set

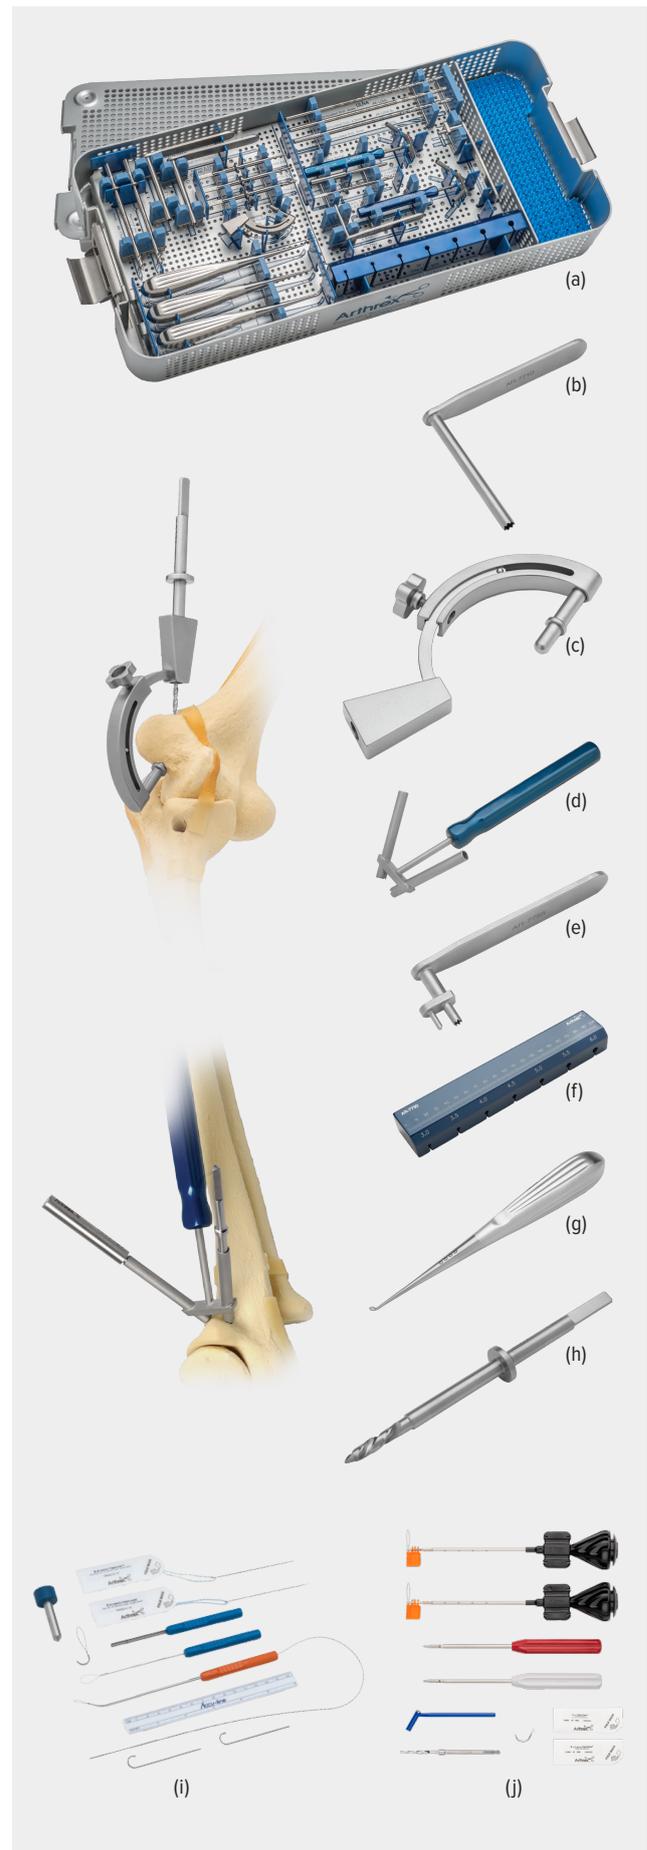

This set includes all the instrumentation needed to perform elbow UCL reconstructions and accommodates the modified Jobe, docking, and DANE TJ techniques in addition to techniques using tenodesis screws or button fixation. This set's guided instruments, drills, and reamers allows precise placement of bone tunnels and sockets in the ulna and humeral epicondyle. The recommended disposable kits provide novel instruments to easily pass sutures through the prepared bone tunnels and sockets, making graft passage quick and easy.

Product Description	Item Number
Elbow UCL Reconstruction Set (a) includes	AR-7700S
Drill, 4.5 mm, cannulated	AR-1204.5L
Drill, 4 mm, cannulated	AR-1204L
Drill, 5 mm, cannulated	AR-1205L

Low-Profile AC Implant

The Low-Profile AC implant and Dog Bone button combine to form a strong, low-profile device optimized for the stabilization of acute AC joint separations. This dual construct features two independent tensionable TightRope sutures preassembled into a clavicle insert and a Dog Bone button that attaches separately to the suture loops after they are passed antegrade through the 3 mm bone tunnels.

Product Description	Item Number
Low-Profile AC Implant Kit Includes Knotless AC implant, Dog Bone button, 3 mm drill, SutureLasso™ SD wire loop, and 5.1 mm cannulated reamer	AR-2371
Knotless AC Implant	AR-2370
5.1 mm Cannulated Reamer w/ stop	AR-2374

Dog Bone™ Button

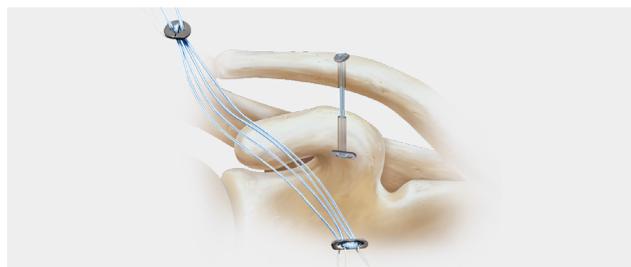

The precontoured, titanium Dog Bone button allows the use of knotless TightRope® technology or multiple FiberTape® sutures for AC joint reduction. The buttons are attached to the Knotless TightRope® implant or FiberTape sutures independently, only suture material will be passed through the clavicle and coracoid tunnels, allowing the repair to be completed through smaller tunnels.

Product Description	Item Number
Acute AC Repair Kit Includes Dog Bone button preloaded onto FiberTape and TigerTape™ loops, free Dog Bone button, 3 mm cannulated drill, and nitinol suture-passing wire	AR-2271
Dog Bone Button	AR-2270

Optional Instruments	
Guide Pin Sleeve	AR-2255CG-02

AC *InternalBrace*™ Ligament Augmentation Repair

InternalBrace ligament augmentation repair combined with CC ligament fixation may help limit posterior displacement of the clavicle. A 5 mm offset guide can help drill the acromion and clavicle anteriorly. The guide accepts both the existing 3.5 mm and 4.75 mm SwiveLock® drills.

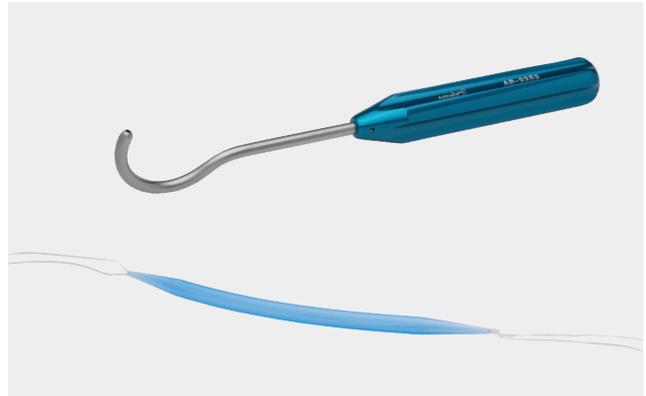

Product Description	Item Number
5 mm Offset Guide for AC <i>InternalBrace</i> Ligament Augmentation repair (a)	AR-2276-05
Twist Drill for 4.75 mm SwiveLock anchor (b)	AR-2276D
Drill for 3.5 mm SwiveLock anchor, sterile	AR-2325D-ST
BioComposite SwiveLock C Anchor, 4.75 mm × 19.1 mm	AR-2324BCC
BioComposite SwiveLock Anchor, 3.5 mm × 15.8 mm	AR-2325BCC
FiberTape® Suture, 2 mm, 7 in (blue), each end tapered to #2 FiberWire® suture	AR-7237-7

The *InternalBrace* surgical technique is intended only to augment the primary repair/reconstruction by expanding the area of tissue approximation during the healing period and is not intended as a replacement for the native ligament. The *InternalBrace* technique is for use during soft tissue-to-bone fixation procedures and is not cleared for bone-to-bone fixation.

Adjustable AC Guides

Coracoid Passing Instruments

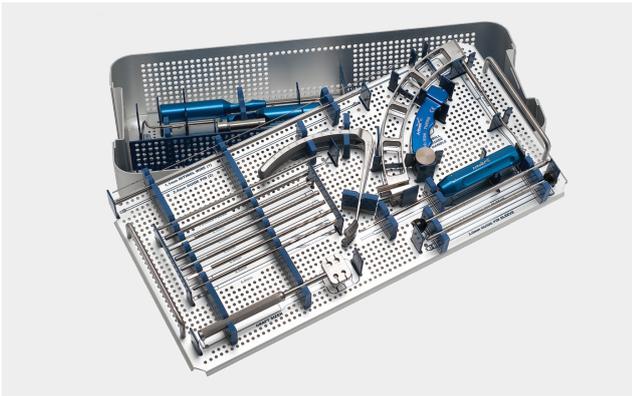

The AC wire passer and flexible obturator allow surgeons to arthroscopically pass a graft around the coracoid to address chronic AC injuries. This system is intended to be used in conjunction with mechanical reduction and fixation of the CC ligaments, particularly with Dog Bone™ buttons and FiberTape® sutures. The coracoid passer is designed to fit through a small incision on the clavicle and curve around the coracoid, allowing the surgeon to pass a FiberStick™ suture through the cannulation and retrieve it on the lateral side of the coracoid. The flexible obturator is designed to shuttle around the coracoid and dilate the soft tissue prior to passing an allograft or autograft.

Product Description	Item Number
AC Wire Passer	AR-2252
Flexible Obturator	AR-2275

The adjustable AC guides give surgeons the ability to arthroscopically hook or rest the tip of the guide on the medial side of the coracoid, as well as independently adjust the guide medially and laterally on the clavicle.

Open Chronic AC Joint Reconstruction

This system enables surgeons to reconstruct chronic AC joint separations anatomically using a tendon graft with backup mechanical fixation. The technique uses 5.5 mm × 8 mm PEEK tenodesis screws to achieve strong graft fixation in the clavicle and allows surgeons to recreate the conoid and trapezoid coracoclavicular ligament bundles. The graft is protected during the healing process by using a strand of FiberWire® suture as backup mechanical fixation.

Product Description	Item Number
PEEK Tenodesis Screw, 5.5 mm × 8 mm	AR-1655PS
Required	
AC Joint Reconstruction Master Set	AR-2255MS

Glenoid Bone Loss Set

The Glenoid Bone Loss Set helps surgeons address the complexity of shoulder instability caused by bony pathology such as anterior glenoid bone loss, bony Bankart lesions, glenoid fractures, and engaging Hill-Sachs lesions. Unique open Latarjet instruments help make the Latarjet technique more consistent and reproducible. The included bony Bankart/glenoid fracture instruments have been designed to allow placement of the partially threaded 3.75 mm cannulated screws, either percutaneously or through a standard arthroscopic cannula.

FiberTape® Cerclage for Glenoid Bone Loss

Bone block cerclage is an innovative arthroscopic surgical technique that preserves the integrity of the subscapularis and provides a metal-free fixation of the bone graft.¹ Two interconnected FiberTape and TigerTape™ cerclage sutures provide firm compression of the graft and strong fixation that minimizes construct displacement at high loads.²

The FiberTape Cerclage for Glenoid Bone Loss Implant system contains all the necessary implants and disposables for the procedure (except capsulolabral repair anchors). To help provide an easy and reproducible surgical technique, the kit includes an arthroscopic measuring probe, two 3-mm cannulated drills of different lengths to facilitate unobstructed drilling, and the MegaLoader suture-passing loop to aid in the passage of sutures into instruments and bone grafts.

Product Description	Item Number

FiberTape® Cerclage System

The FiberTape cerclage system consists of specially designed FiberTape sutures, passing needles, passing hooks, and a tensioner. The system is designed to replace standard cable and wire systems commonly used in upper and lower extremity trauma, arthroplasty, and sternal closure indications.

- 100% radiolucent – no radiographic interference from cerclage
- No concerns of metal mismatch with adjacent implants
- No sharp ends or broken wires to potentially harm the patient or medical staff
- No metal debris migration or concerns of metallosis

FiberTape® Sternal Closure

The FiberTape Sternal Closure System is a 100% nonmetallic, suture-based alternative to metal wires traditionally used to close the sternum after cardiac surgery. The FiberTape sternal closure implant, which is implanted similarly to metal wires, provides strong, reproducible compression¹ that helps support sternal approximation and stabilization.

Humeral Nail System

The Arthrex Humeral Nail System consists of both short and long intramedullary nails. The 15 cm short nail is best suited for simple two-part fractures of the proximal humerus involving the surgical neck of the humerus and for proximal third humeral fractures without comminution. The long humeral nail is primarily intended for humeral shaft fractures, which are inherently not prone to varus malposition.

Clavicle Plate and Screw System

This system is a comprehensive set of plates, screws, and instrumentation designed to treat central third and distal clavicle fractures. The low-profile, precontoured, stainless steel plates combine locking and nonlocking options.

Product Description	Item Number
Clavicle Plate Set includes	AR-2650S
Cannulated Driver Handle	AR-13221AOC
BB-Tak, disposable	AR-13226
Distal Clavicle Plate Positioning Handle	AR-2659
Plate Bending Pliers	AR-2660
Distal Clavicle Screw and Drill Guide, left	AR-2664L
Distal Clavicle Screw and Drill Guide, right	AR-2664R
Verbrugge Forceps w/ pivoting jaw	AR-2662
K-wire, 0.062 in, 3 in, disposable	AR-2663
T10 Hexalobe Driver	AR-2665-T10
T15 Hexalobe Drive Shaft, long	AR-2666-T15
Drill/screw Guide Sleeve	AR-2668
Drill 2 mm	AR-2669
Screw Depth Indicator, 2.7 mm	AR-2670
Step Drill for 2.5 mm fragment screw	AR-2752
T8 Hexalobe Driver	AR-8916-22
T15 Hexalobe Driver	AR-8941DH
Drill Guide, 2.6 mm/1.35 mm	AR-8943-03
Bone Reduction Forceps	AR-8943-07

TRIMANO FORTIS® Support Arm

The TRIMANO FORTIS support arm acts as the surgical team’s “third hand” by securely and safely holding the patient’s arm in any desired position during arthroscopic or open shoulder surgery performed in the beach chair position. The compact and lightweight device is easily attached to any OR table Clark rail and is ready for immediate use. No additional power or air connections are required. The patient’s arm can be moved in any direction by simply pressing the support arm handle. Releasing the handle locks it into the desired position. The convenient TRIMANO Beach Chair Kit includes a sterile drape for the support arm, an ergonomically designed foam arm holder and Coban™ self-adherent wrap, and allows for quick and easy patient preparation, while gently protecting the operative arm.

Product Description	Item Number

Coban is a registered trademark of 3M.

Beach Chair Positioner

The “Lift-Assist” Beach Chair Positioner System allows unobstructed posterior access and makes repositioning the patient quick and easy. The free-sliding head positioner feature protects the patient’s neck when raising and lowering the table and the fold-away shoulder wings remove completely for unobstructed shear-free access to the operative shoulder. The lift-assist design enables nearly effortless positioning as the piston supports most of the patient’s weight.

Shoulder Suspension System (S3)

The Arthrex Shoulder Suspension System for lateral decubitus position combines simple and intuitive functionality, providing the surgeon with optimum arthroscopic visualization for all shoulder pathology. The tower is lightweight and folds into a small vertical footprint for easy storage and setup by the clinical staff. Intraoperative control of abduction, internal/external rotation, and lateral distraction can be easily performed in a sterile fashion, allowing for the utmost in direct control.

3-Point Shoulder Distraction System

This versatile system provides safe, effective, and easy positioning of the shoulder during all types of arthroscopic or open shoulder surgery performed in the lateral decubitus position.

Product Description	Item Number
3-Point Shoulder Distraction System	AR-1600M

Arm Sleeves

The lateral traction arm sleeve provides a simple, economical “roll-down” solution for traction in the lateral decubitus position.

The STaR Sleeve™ arm holder is a soft foam traction boot designed to gently cradle the arm, forearm, and wrist during distal distraction in any desired position of abduction.

Product Description	Item Number
Lateral Traction Arm Sleeve, sterile, qty. 5 (a)	AR-1635

This description of technique is provided as an educational tool and clinical aid to assist properly licensed medical professionals in the usage of specific Arthrex products. As part of this professional usage, the medical professional must use their professional judgment in making any final determinations in product usage and technique. In doing so, the medical professional should rely on their own training and experience, and should conduct a thorough review of pertinent medical literature and the product's directions for use. Postoperative management is patient-specific and dependent on the treating professional's assessment. Individual results will vary and not all patients will experience the same postoperative activity level and/or outcomes.
