

# The EcoSuctioner

The EcoSuctioner is the latest offering in ergonomic fluid containment surgical mats from Arthrex®. Standing long hours in the operating room can put stress on your body, so why not enjoy the comfort of the suction-equipped EcoSuctioner? As the largest ergonomic comfort mat on the market at 28" x 40", it is large enough for **two people to stand on comfortably.**

The EcoSuctioner also has a whisper-quiet suction tube that is fed by gravity channels to assist in managing fluid and keeping the surgical floor dry. The bottom of the EcoSuctioner is coated with a nonslip material that also helps to contain any excess fluid as well as keep the mat in place during the surgical procedure.
