The Diamond Standard in Arthroscopic
Femoroacetabular Impingement (FAI) Surgery

Diamond-coated head

- 19 cm (hip length)
- 4.0 and 5.0 mm diameters

Learn more about
DiamondCut burr

Hip-length DiamondCut™ burrs feature a diamond-coated head designed for precise control during resection of pincer and cam deformities associated with FAI.

- Diamond-coated burr head for controlled bone resection
- Designed to minimize soft-tissue wrapping on the burr head
- Engineered to minimize skipping and provide superior control
- Consistent cutting in both forward and reverse
