# FiberWire® Suture Family

## Leading the High-Strength Suture Market Since 2001

The FiberWire suture family sets the standard for high-strength orthopedic sutures and tapes, delivering exceptional performance across a broad spectrum of surgical applications. Engineered for the rigorous demands of soft-tissue fixation and repair, FiberWire sutures provide an optimal balance of strength, handling, and consistency, supporting both routine procedures and advanced fixation constructs. Renowned for their versatility, they are widely used in orthopedic and sports medicine applications for tendon and ligament repair throughout the body.<sup>1</sup>

- › Patented core design for superior strength and handling<sup>2</sup>
- › More than 50 million strands sold<sup>3</sup>
- › Most versatile offering of sizes, colors, and needles for use throughout the body
  - › Sizes range from 4-0 through #5
  - › Collagen-coated and flat, tape-style suture options also available
- › Industry-leading number of specialty suture options
- › Next-generation SutureTape offers improved handling characteristics, resists tissue pull-through, and creates tighter, smaller knot stacks<sup>4</sup>

# SutureTape

## At the Forefront of Suture Technology

Engineered for strength and precision, flat-braided SutureTape delivers superior resistance to tissue pull-through compared to #2 suture.<sup>4</sup> Its innovative design enhances handling and knot security while minimizing knot stack size for a cleaner, more efficient closure.

Available in 0.9 mm, 1.3 mm, and 1.7 mm widths, SutureTape comes in a variety of colors, patterns, and needle configurations to meet the demands of any surgical technique.

SutureTape provides a wider footprint and broader tissue compression for the repair, while also providing improved handling characteristics.

The load at 3 mm of displacement was 39% higher for 1.3 mm SutureTape than the #2 suture.<sup>4</sup>

SutureTape, X-pattern, (1 blue/black, 1 black/white) 1.3 mm, 102 cm long, w/ tapered cutting needle, 36.6 mm, ½ circle (AR-7501T)

SutureTape, 1.3 mm, 40 in (black/white), w/ tapered needle, 36.6 mm, ½ circle (AR-7506T)

SutureTape, 1.3 mm, 40 in (blue/dark blue), w/ tapered needle, 36.6 mm, ½ circle (AR-7506)

SutureTape, 1.7 mm, 38 in (white/blue) w/ conventional cutting needle, 48 mm, 1/2 circle (AR-7511)

Tighter, smaller knot stacks compared to #2 suture<sup>1</sup>

# FiberWire® and TigerWire® Sutures

## High-Strength Suture

Introduced in 2001, FiberWire suture has more than two decades of clinical use and remains a trusted suture for soft-tissue fixation in orthopedic surgery. Engineered with a multistrand core of ultra-high molecular weight polyethylene (UHMWPE) and encased in a braided jacket of polyester and UHMWPE, FiberWire suture offers exceptional durability and performance. It is available in sizes ranging from 4-0 to #5, with a variety of colors and needle configurations to suit diverse surgical needs.

TigerWire suture builds on this same high-strength design, incorporating a distinctive black marker strand to enhance visibility and simplify identification during joint reconstruction and soft-tissue repair procedures.

#5 FiberWire Suture, 38 in (blue) w/  
conventional cutting needle, 48 mm, 1/2 circle  
(AR-7211)

#2 FiberWire Suture, 38 in (1 blue, 1 white/  
black) w/ tapered needle, 26.5 mm, 1/2 circle  
(AR-7208)

#2 FiberWire Suture, 38 in (blue) w/  
tapered needle, 26.5 mm, 1/2 circle  
(AR-7200)

#2 FiberWire Suture, 38 in (1 white, 1 blue/black)  
(AR-7240)

Keep your sutures organized  
with the FiberWire cart, which  
holds up to 96 boxes of suture.  
(AR-7200CART)

# FiberTape® Suture

## Leading Suture for Knotless Repairs

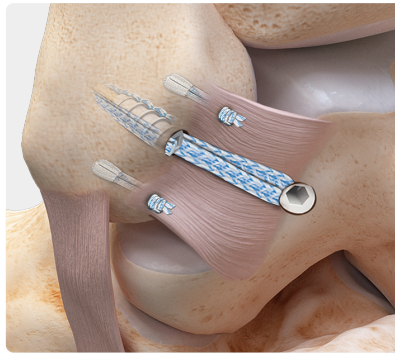

FiberTape suture is the leading choice for knotless repairs, offering broad compression and superior resistance to tissue pull-through. This ultra-high-strength suture features a long-chain polyethylene structure, similar to FiberWire® suture, ensuring durability and reliability in demanding repairs.

The 2 mm FiberTape suture includes a #2 core, making it ideal for repairs involving degenerative cuff tissue where tissue pull-through is a concern. Its wide footprint enhances load distribution and is 27% more resistant to tissue pull-through compared to traditional round #2 sutures.<sup>5</sup>

For procedures requiring a smaller profile, 1.7 mm FiberTape suture is also available, featuring a size 0 core. This option delivers the same high-strength performance in a more compact design, giving surgeons flexibility based on tissue quality and repair technique

1.7 mm FiberTape used in a FiberTak® SpeedBridge™ repair

Brostrom repair with InternalBrace™ ligament augmentation using FiberTape suture

The InternalBrace surgical technique is intended only to augment the primary repair/reconstruction by expanding the area of tissue approximation during the healing period and is not intended as a replacement for the native ligament. The InternalBrace technique is for use during soft tissue-to-bone fixation procedures and is not cleared for bone-to-bone fixation.

1.7 mm FiberTape suture, each end tapered to 0 FiberWire suture

2 mm FiberTape suture, each end tapered to #2 FiberWire suture

FiberTape and TigerTape™ sutures with swaged tails are available preloaded on SwiveLock® anchors, an offering that is unique to Arthrex and allows for a single pass with the Scorpion™ suture passer.

Easily manage sutures with unique instruments designed for tape-style suture

KingFisher® Retriever/Grasper (AR-13971SR)

FiberTape Retriever (AR-13974SR)

Penetrator™ Suture Retriever (AR-2167ST-3)

FiberTape Cutter (AR-13250)

TigerTape Suture, 1.7 mm, 8 in working length, 30 in overall (white/black), each end tapered to 0 FiberWire suture (AR-7273-8T)

TigerTape Suture, 2 mm, 7 in working length, 30 in overall (white/black), each end tapered to #2 FiberWire suture (AR-7237-7T)

FiberTape Suture, 1.7 mm, 8 in working length, 30 in overall (blue), each end tapered to 0 FiberWire suture (AR-7273-8)

FiberTape Suture, 2 mm, 7 in working length, 30 in overall (blue), each end tapered to #2 FiberWire suture (AR-7237-7)

# LabralTape™ Suture

## Broad Compression for Instability Repairs

This smooth, low-profile, 1.5 mm specialty tape is made from polyethylene and provides a wider footprint. LabralTape suture is 37% more resistant to tissue pull-through compared to #2 suture<sup>6</sup> and is ideal for restoring labral height in instability repairs when used with a 2.9 mm PushLock<sup>®</sup> or 3.5 mm Labral SwiveLock<sup>®</sup> suture anchor.

LabralTape Suture, 1.5 mm, 36 in (white/black) (AR-7276T)

LabralTape Suture, 1.5 mm, 36 in (white) (AR-7276)

# FiberStick™ and TigerStick® Sutures

## Eliminate the Suture Shuttle Step

FiberStick and TigerStick sutures have a stiffened end for convenient, easy advancement through most cannulated instruments or spinal needles, alleviating the need for a monofilament suture or wire suture shuttle.

SutureTape FiberStick suture incorporates a smooth monofilament tip to facilitate easy passage, paired with SutureTape as the working suture to provide a flat, braided profile for easy handling and knot security.

SutureTape FiberStick Suture, 1.3 mm (black/white X-pattern), 50 in, one end stiffened, 13.7 in (AR-7509T)

FiberStick Suture, #2 FiberWire Suture, 50 in (blue), one end stiffened, 12 in, 5/box (AR-7209)

# FiberLink™ and TigerLink™ Sutures

## Create a Cinch Stitch With One Tail

Achieve broader compression in knotless repairs with FiberLink and TigerLink sutures, available in 1.7 mm, 1.3 mm, and 0.9 mm SutureTape, as well as #2 and #0 FiberWire® options. Each suture features a closed loop on one end, enabling efficient creation of cinch stitches—simply pass the single suture tail through tissue and feed it through the loop to secure.

These sutures are also compatible with the Scorpion® suture passer, allowing for the simultaneous shuttling of multiple sutures through tissue, helping to streamline complex repairs and enhance surgical efficiency.

#2 FiberLink Suture, w/ closed loop, 26 in (blue)  
(AR-7235)

#2 TigerLink Suture, w/ closed loop, 26 in (white/black)  
(AR-7235T)

FiberLink SutureTape, 1.3 mm, w/ loop (white/blue)  
(AR-7535)

TigerLink SutureTape, 1.3 mm, w/ loop (white/black)  
(AR-7535T)

FiberLink Plus™ SutureTape, 1.7 mm, w/ loop (white/blue)  
(AR-7538)

(AR-7538T)

Rotator Cuff Repair

Instability Repair

Loop 'N' Tack™ Biceps Repair

# SutureTag™ Looping Stitch

## Smaller, Faster, Stronger Tendon Fixation

The SutureTag looping stitch creates a continuous running rip-stop configuration designed to reinforce tendon repairs while minimizing tissue passes. This novel construct delivers a lower-profile, faster, and stronger repair compared to a traditional Krackow stitch.<sup>7</sup>

The SutureTag suture has a 1.3 mm “tag” that bifurcates into two #2 suture limbs for increased suture-to-tendon interface while compressing and tapering the tendon to reduce repair bulk. The 36.6 mm, 1/2-circle tapered needle simplifies passage through both tendon and suture, enabling efficient, reproducible repairs.

Subpectoral biceps tenodesis with FiberTak® button and SutureTag looping stitch

SutureTag, 1.3 mm, (white/blue/black), w/ needle (AR-7274TT)

SutureTag, 1.3 mm, (white/black), w/ needle (AR-7274T)

# FiberLoop® and TigerLoop™ Sutures

## Strengthen and Simplify Tendon Suturing

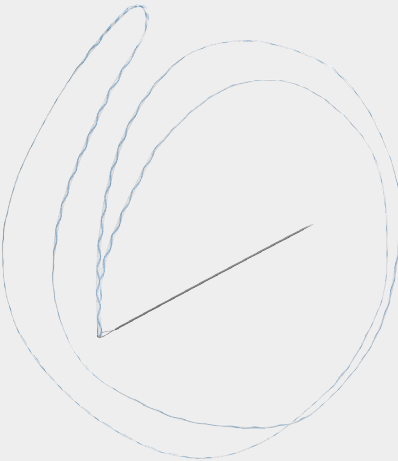

Ideal for quick and easy whipstitches, both ends of FiberLoop and TigerLoop sutures are attached to a single needle to create a suture loop. This suture is available in #0, #2, and SutureTape and smaller 4-0 and 2-0 options. These small-diameter looped FiberWire® sutures are perfect for strong multistrand flexor and extensor tendon repairs and help minimize tendon damage from multiple needle passes.

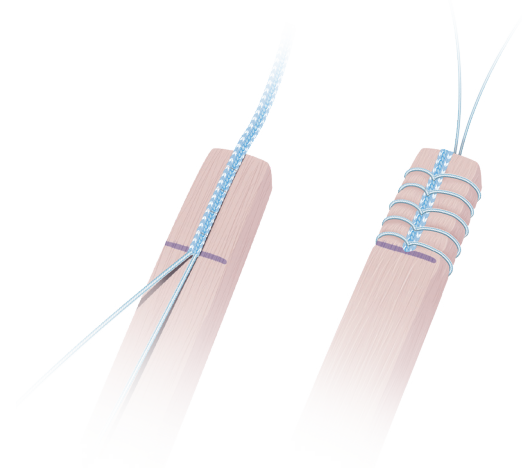

#2 FiberLoop Suture,  
w/ straight needle 20 in, blue  
(AR-7234)

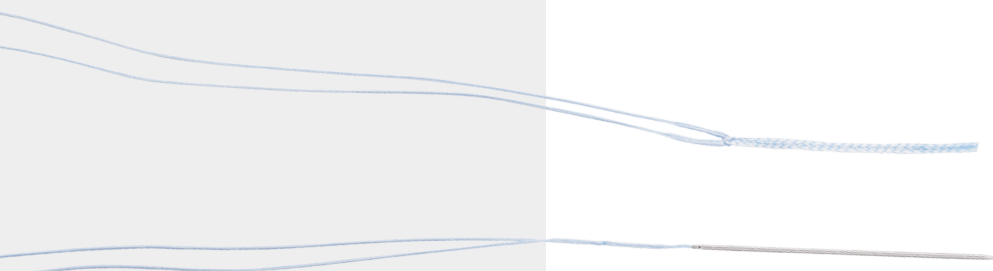

Whipstitches created with FiberLoop suture

SutureTape FiberLoop, 1.3 mm, 20 in loop  
(white/blue) w/ 76 mm straight needle  
(AR-7534)

FiberLoop with FiberTag™ suture

FiberLoop with FiberTag Suture,  
w/ swaged straight needle  
(AR-7266)

The SpeedWhip™ rip-stop technique eliminates the weak link in graft preparation by reinforcing the suture-tissue interface with a FiberTag® scaffold. Incorporate a FiberTag suture into the end of the FiberLoop construct to allow each needle pass to incorporate both the graft and the FiberTag scaffold. Compared to standard stitching alone, this construct has demonstrated increased strength.<sup>8</sup>

# Meniscus Repair Needles

## Solution for Inside-Out Meniscus Repair

Stainless steel meniscus repair needles include a 0.9 mm, 38-inch Mini SutureTape, which provides broader compression than round suture. Perform standard inside-out meniscus repairs with all the benefits of FiberWire® suture and SutureTape.

2-0 FiberWire Meniscus Repair Needles  
(AR-7223)

Mini SutureTape Meniscus Repair Needles,  
w/ 0.9 mm SutureTape and 2 needles  
(AR-7523)

## FiberSnare® Suture

### Ideal for Shuttling Suture Through Bone Tunnels

FiberSnare suture is #2 FiberWire suture with the first 12 inches stiffened for convenient, easy advancement through most cannulated instruments, alleviating the need for a monofilament suture or wire suture shuttle. FiberSnare suture features a small loop at one end for shuttling through bone tunnels and comes with a thin plastic tube that protects the stiffened suture until use.

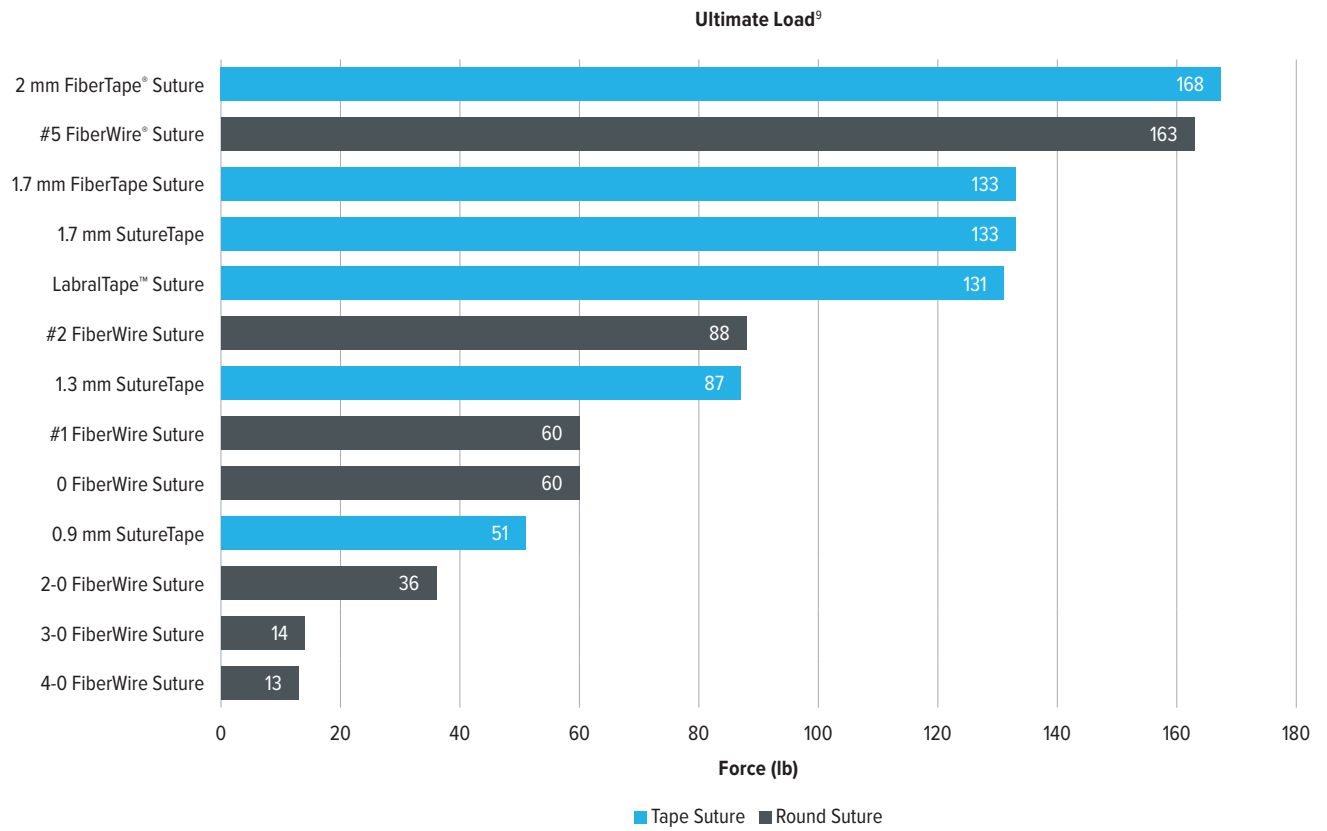

#2 FiberSnare suture, #2 FiberWire suture, 26 in  
(AR-7209SN)

FiberLoop with FiberTag Suture, w/ swaged straight needle	AR-7266
FiberLoop SutureTape, 1.3 mm, 20 in loop (white/blue) w/ 76 mm straight needle	AR-7534
TigerLoop SutureTape, 1.3 mm, 20 in loop (white/black) w/ 76 mm straight needle	AR-7534T
#2 FiberLoop Suture w/ straight needle 20 in (blue)	AR-7234
#2 FiberLoop Suture, braided polyblend white suture looped w/ 20 in working length straight needle	AR-7234-01
#2 FiberLoop Suture, 20 in (blue) w/ straight needle, collagen-coated	AR-7234B
#2 FiberLoop Suture, braided polyblend blue suture looped w/ 20 in working length curved needle	AR-7234C
#2 TigerLoop Suture, braided polyblend white/green suture looped w/ 20 in working length straight needle	AR-7234T
#2 FiberLoop Suture w/ swaged straight needle	AR-7284
#0 FiberLoop Suture, braided polyblend blue suture looped w/ 20 in working length straight needle	AR-7253
#0 TigerLoop Suture, braided polyblend white/green suture looped w/ 20 in working length straight needle	AR-7253T
2-0 FiberLoop Suture, 30 in (blue) w/ diamond-point needle, 48 mm ½ circle	AR-7232-01
2-0 FiberLoop Suture, 24 in (blue) w/ diamond-point needle, 26.2 mm, ¾ circle	AR-7232-02
2-0 FiberLoop Suture, 13 in (blue) w/ diamond-point straight needle, 64.8 mm	AR-7232-03
2-0 FiberLoop Suture, with taper point needle, 17.9 mm, ¾ circle, 14 in loop	AR-7232-05
4-0 FiberLoop Suture, 6 in (blue) w/ tapered needle, 17.9 mm, ¾ circle	AR-7229-12
4-0 FiberLoop Suture, 10 in (blue) w/ tapered needle, 17.9 mm, ¾ circle	AR-7229-20
4-0 FiberLoop Suture, 6 in (white) w/ tapered needle, 12.7 mm, ½ circle	AR-7249-12
4-0 FiberLoop Suture, 10 in (white) w/ tapered needle, 12.7 mm, ½ circle	AR-7249-20

**Meniscus Repair**

0.9 mm SutureTape Meniscus Repair Needles, trocar tip needle, 13 in	AR-7523
2-0 FiberWire® Meniscus Repair Needles, trocar tip needle, 13 in	AR-7223
2-0 FiberWire Meniscus Repair Needles, small, trocar tip needle, 13 in	AR-7223SM

**FiberSnare® Suture**

FiberSnare Suture, #2 FiberWire suture 26 in, (green), stiffened w/ closed loop, ½ in	AR-7209SN
---	-----------

This description of technique is provided as an educational tool and clinical aid to assist properly licensed medical professionals in the usage of specific Arthrex products. As part of this professional usage, the medical professional must use their professional judgment in making any final determinations in product usage and technique. In doing so, the medical professional should rely on their own training and experience and should conduct a thorough review of pertinent medical literature and the product's directions for use. Postoperative management is patient-specific and dependent on the treating professional's assessment. Individual results will vary and not all patients will experience the same postoperative activity level or outcomes.
