

Surgical Outcomes System™ Global Registry

Publications

The Surgical Outcomes System registry is a global orthopedic and sports medicine registry that is cloud-based and tablet-friendly. The intuitive platform enables surgeons to easily collect and analyze patient outcomes and procedures to address the demands of value-based health care. The SOS™ global registry allows surgeons to remotely monitor their patients' outcomes longitudinally through patient-reported questionnaires and clinician-reported objective measures. The registry will automatically email surveys to patients who have opted in, at predefined time points. The primary purpose of the SOS global registry is to monitor and evaluate the outcomes of various orthopedic and sports medicine procedures, leading to the development of evidence-based protocols for treating patients. The registry's secondary purposes include analysis and publication of results, patient education, and calculating the cost-effectiveness of treatment procedures and products.

Studies Highlighting the SOS Global Registry

To access detailed study information, click on the journal title.

Ribbans W,
Mackay GM

[The addition of an "internal brace" to augment the Broström technique for lateral ankle ligament instability.](#) *Tech Foot Ankle Surg.* 2016;15(1):47-56.
doi:10.1097/BTF.0000000000000111

Denard PJ,
Brady PC,
Adams CR,
et al

[Preliminary results of arthroscopic superior capsule reconstruction with dermal allograft.](#) *Arthroscopy.* 2018;34(1):93-99. doi:10.1016/j.arthro.2017.08.265

Denard PJ,
Noyes MP,
Walker JB,
et al

[Radiographic changes differ between two different short press-fit humeral stem designs in total shoulder arthroplasty.](#) *J Shoulder Elbow Surg.* 2018;27(2):217-223.
doi:10.1016/j.jse.2017.08.010

Denard PJ,
Noyes MP,
Walker JB,
et al

[Proximal stress shielding is decreased with a short stem compared with a traditional-length stem in total shoulder arthroplasty.](#) *J Shoulder Elbow Surg.* 2018;27(1):53-58.
doi:10.1016/j.jse.2017.06.042
